*Alterations and additions to Part A of the Aligarh District Gazetteer, bringing it up to date (1912-13).*

TABLE I.

The latest census (1911) shows the total number of persons in Aligarh district to be 1,165,680 persons, distributed as follows:—

Atrauli	..	..	..	..	203,867
Aligarh	..	..	..	..	257,341
Iglas ..	..	..	..	..	116,110
Khair ..	..	..	..	..	179,152
Hathras	..	..	..	..	210,936
Sikandra Rao	..	..	..	..	198,274

The decrease on the 1901 figures (a decrease of 2·9) is due to the epidemic of malaria in 1908 which carried off very many persons, and also to the excess of emigration over emmigration. The birth rate has exceeded the death rate, the former being 40·7 as against 39·0. The average density to the square mile is 599, or 546 omitting the city population.

There were only 852 females to every 1,000 males in the district but this figure though low is (as before) higher than the figures of any of the adjacent district save Bulandshahr. Out of every 10,000 people 8,507 were Hindus, 1,229 were Muhammadans, 102 were Christians, 136 were Aryas. The Hindu figures have decreased from 8,609 ten years ago, the Muhammadans from 1,240 at the same period. The Christian figures on the other hand have risen to 102 from 42, and the Aryas have risen from 80.

TABLE III.

In the last decade the average birth rate per mille was 40·72, the average death rate per mille was 39·05.

In 1908 the death rate rose to 64·36 owing to the epidemic of malarial fevers and the birth rate in that year dropped to 33·58 and further in 1909 to the very low figure of 26·93 for the same reasons. The average death rate for the three years, 1909 to 1911, is 38·83 and the birth rate 34·66.

TABLE IV.

For the decade 1900 to 1911 the average death from fever was 37,664 or 80.31 per cent. Total average mortality in the decade was 46,892. During the three years, 1909 to 1911, the deaths from fever average 34,806 annually.

For the decade 1900 to 1911 the average death from cholera was 408 or .87 per cent. and the average for the three years, 1909 to 1911 was 367.

From 1900 to 1911 the average of deaths from small-pox was 201 or .43 per cent. of the average total mortality 46,892.

In 1909 there were only 8 deaths from plague, but the disease again became prevalent in 1910 (2,705 deaths) and the figures rose to 6,072 in 1911, being the highest recorded for this district with the exception of the year 1905.

TABLE VI.

Among the autumn crops the foremost place is taken by cotton, which covers on an average 114,765 acres. This figure is large but by no means so large as it was some years ago. Statistics show that the cultivation of cotton is on the decrease.

TABLE XI.

The average for the last five years rose to Rs. 78,281, the receipts for 1911-12 being the highest on record. Of this average Rs. 49,387 were derived from duty and Rs. 28,893 from licence fees. The receipts in 1910-11 were Rs. 82,321, and the consumption 22,289 gallons. In the last five years the average annual consumption was 20,941 gallons.

The receipts on account of foreign liquors have been gradually declining since 1907-8, figures for 1911-12 being Rs. 925 only. Of the six shops in the district for the retail vend of foreign spirits, one was closed in 1909-10 and another in 1910-11.

The income on account of hemp drugs is now rising. The average for the five years ending 1911-12 was 351. The tari contract however is not such a speculation as to attract an expert financier. The receipts for the past 5 years average Rs. 18,005. As compared with the decade preceding 1907-8, they exhibit an increase, though they have fallen off a little since 1908-09. The

consumption shows a marked decline since. From 1892-3 to 1896-7 it averaged 58.39 maunds of charas and 278 maunds of bhang for the decade, 1897-8 to 1906-7, the figures were 24.5 and 175.3 maunds, respectively, while for the five years ending 1911-12 they were 9.02 and 69 maunds respectively. The very low consumption in 1909-10 and 1910-11 was due to the mismanagement of the contractors.

*Opium.*—The average income for the 5 years, 1907-8 to 1911-12 rose to Rs. 46,485, and the consumption to 80 maunds 3 seers. The decreased consumption in the last two years is due to the issue price of opium having been raised from April 1, 1910. It is expected that the abolition of official vend will fetch still more income in future years. Opium is not now produced in this district and there can be no suspicion of smuggling as in spite of continuous efforts made by the Excise Inspector for over 3 years not a single case of smuggling has been detected.

---

TABLE XII.

The average total receipts for the ten years ending 1911-12 were Rs. 4,55,013, rising in 1910-11 to Rs. 6,32,615 and the expenditure, Rs. 11,739, annually. Of the former Rs. 3,68,375 were derived from the sale of judicial stamps, representing nearly 81 per cent. of the whole.

---

TABLES XIII AND XIV.

The average total receipts for the four years ending 1911-12 were Rs. 68,300 as against Rs. 77,650 for the previous five years. Of the former amount Rs. 3,000 were collected by companies while Rs. 18,885 were said on incomes ranging from Rs. 1,000 to Rs. 2,000; and Rs. 43,732 were paid by persons assessed at the higher rates. The income under part IV shows some decrease. Hathras tahsil is mainly responsible for the decrease which is due to the heavy losses sustained by some cotton merchants and the failures of important firms.

---

TABLE XV.

Up till 1910, the duties of the Secretary, District Board, were performed by one of the Sub-Divisional officers but in that year

the Board, with the sanction of Government, appointed a whole time paid secretary and an officer of the rank of Deputy Collector was transferred to the Board for employment in this post. The paid secretary is ex-officio a member of the Board which now consists of twenty-six members including the Chairman and the Secretary of whom eighteen are non-official elected members, one a nominated non-official and five Sub-Divisional officers.

#### TABLE XVII.

There are now three circle inspectors. In the armed police there are two sub-inspectors, 26 head constables and 168 constables.

There are 43 Sub-Inspectors, 54 head constables and 560 constables including 19 head constables and 238 constables employed in watch and ward duties in municipal towns and armed with spears.

There are now 2,075 village watchmen and 122 road chaukidars.

#### TABLE XVIII AND LIST OF SCHOOLS.

The statements include the Muhammadan Anglo-Oriental College and the District High School at head quarters, the Government High School at Hathras, ten Vernacular Middle Schools at all the tahsil head quarters and at Beswan, Sasni, Bijeygarh and Tappal, 39 Municipal Schools at Aligarh and Hathras, 75 Upper and 86 Lower Primary Schools managed by the District Board, 32 girls' schools belonging to the same authority, 43 Municipal aided schools, three of which are for girls, two Model girls' schools at Koil and Hathras and a training class for female teachers at Koil, and three training classes for boys school teachers, of which one was opened in 1905 and two in 1908. The two Government High Schools were provincialized and the District Board entirely relieved from their expense in 1911. Ten Municipal Schools in addition to the 39 mentioned above will be opened in Aligarh and Hathras by July 1913.

#### LIST OF FAIRS.

The average annual expenditure on the Aligarh Fair down to 1913 during the last 4 or 5 years was over Rs. 13,000.

## Alterations and Additions to Part A of the Muttra District Gazetteer bringing it up to date.

### CHAPTER I.

#### GENERAL FEATURES.

Page 11 (*middle*).

The scheme was first set on foot in 1908 ; its general aim was to clear out existing drains and, if necessary, add new ones, in order to allow the Jumna to flood the jhil during the rains, and then to hold up the water until October or November. It was found that in former years the jhil had been filled every year, but that for the past 20 years or so it had, in normal years, remained dry. By renewing the annual submersion, the wells in the district would be kept at a much higher level than at present, and irrigation could be provided for a number of greatly impoverished villages near Nohjhil.

The Noh-  
jhil  
Scheme.

The zamindars of Nohjhil were however bitterly opposed to this scheme, as they were in the habit of planting both *kharif* and *rabi* crops in the jhil. If the water were held up every year from August to November, they would not only lose their *kharif* crop but would, they said, have insufficient time for sowing the *rabi* crop.

At the end of 1910 however it was decided that in view of the large number of villages which would be benefited the objections of the Nohjhil zamindars should be disregarded and the scheme carried out.

A carefully considered scheme was prepared by the Canal department, the cost being estimated at Rs. 23,000.

It provided, by means of regulator and sluices at either end of the horse-shoe depression, for the regular submersion of the area during the monsoon, and the gradual letting out of the water, as the *rabi* season approached. The carrying out of the scheme was made contingent on the zamindars, for whose benefit it was intended,

agreeing to pay an average submersion rate, calculated to repay the usual interest on the capital sum expended, and maintenance charges.

As was only to be expected, the Nohjhil zamindars adopted a hostile attitude to the scheme from the outset, on the same grounds as are mentioned above. The leading zamindars of the other villages concerned were taken over the submersion area and the whole proposal carefully explained to them. It then became apparent that the scheme did not commend itself to them either. It was objected that the land by continuous submersion would turn sour; that the usual rotation of crops could not be observed; that there would not be time to plough the land properly between the time when the water was let out, and the time that *rabi* sowings commenced; and that even if there were, there could not be sufficient labour available to prepare so large an area.

Proposal for biennial submersion, which would have countered most of these objections met with no greater favour.

When it became clear that the persons for whose benefit the scheme had been drawn up were not in favour of it, and were not ready to contribute towards the cost of its execution the proposal was abandoned. But it is possible that if the tract is again visited by severe drought, the zamindars will be only too ready to have the scheme carried out, although in the time of their wealth, they would have nothing to do with it.

*Page 14 (middle).*

Taken as a whole the Muttra district does not now suffer from water-logging. On the contrary, owing to the cycle of dry years through which it has passed, the complaint is rather in the opposite direction.

The only tract which now suffers from supersaturation is that adjacent to the main line of the Agra-Dehli Canal. Here especially towards the north, in Chhata tahsil, malaria is rife, and the saline efflorescence known as *reh* has made its appearance in many villages.

At Kosi itself elaborate works are in progress with the object of still further improving the drainage of the town and preventing water-logging. A more detailed description of these will be found under the article Kosi. Along the Jumna cliff portion of

the Muttra tahsil, and throughout the tahsils of Mahaban and Sadabad (but especially in Mahahan) the water level has fallen seriously, and the evil would seem to be on the increase.

*Page 15 (at end of first paragraph).*

The precarious tracts in the district at present are—

- (1) The Jumna cliff tracts on both sides of the river throughout the district, but more particularly in tahsils Muttra and Mahaban.
- (2) The western boundary tract of the Muttra tahsil.
- (3) The north-east brackish water tract of the Mahaban tahsil near the boundary of the Mursan pargana of the Aligarh district.
- (4) The Karwan nadi tract in tahsil Sadabad.

Precarious tracts.

The canal extensions on the Gobardhan distributary system effected some improvement in the western boundary tract, but the protection afforded is still very meagre, and must remain so until the supply in the main canal can be augmented.

The Jumna cliff tract presents great difficulties. Canal-irrigation would seem to be hardly feasible there, not only on account of the shortage of supply in the canal but also owing to the levels of the country. Some measure of protection might be possible by lift irrigation from the Jumna with mechanically driven pumps.

Tracts (3) and (4) could be satisfactorily protected if there were more water in the Mat and Hathras branch canals respectively. At present however this supply is so short that the canal engineers decline, and decline rightly, to make any extensions. Failing canal extensions, the only remedy for the north-east tract of Mahaban tahsil is lift-irrigation, on a large scale from central wells situated in the sweet water oases that occur here and there in the brackish water areas. Much could be done to improve the Karwan nadi tract if effective steps were taken to prevent further scouring in the bed of this river. The Karwan nadi (also known as the Jhirna lower down) was at one time a winding slow-flowing stream. Complaints of flooding were made in 1887 and the Government at the instance of the zamindars (chiefly of the Bulandshahr and Aligarh districts) straightened the bends of the river's course and lowered the bed by a few feet. The result has been far more

drastic than was intended. There has been a continuous retrogression of levels, and the river now presents, especially in its lower reaches beyond Sadabad, the appearance of a deep ravine or drainage cut. Year by year, the bed gets deeper: the fields on either bank are becoming eroded, and the water level falls. The agricultural value of the villages bordering on this river has been seriously affected. Spring crops can now be grown with difficulty except by artificial irrigation and the labour and cost of irrigation has been seriously increased.

Proposals have been submitted for remedying this state of affairs on more than one occasion and the matter is now again under the consideration of the Government..

Health.

*Page 26.*

During the past few years there has been a steady improvement in the figures both for births and deaths. The only bad year was 1908, in which the death-rate rose to 76.95 and the number of deaths exceeded the number of births by no less a figure than 40,905. Apart from this year however the mortality has steadily decreased; the figures for the last year under review, 1912, are specially noteworthy. The average per mille both of births and deaths is quite abnormal, the former having risen to 42.96 and the latter fallen to 30.75. This decrease in the rate of mortality is chiefly due to a considerable reduction in the number of deaths from the three diseases which are always most fatal (*viz.* plague, malarial fever, and bowel complaints) with the exception of the year 1908, referred to above.

Fever.

The mortality from fever has steadily decreased, the number of deaths in 1912, *viz.* 16,294, being the lowest on record since 1895. In 1908 however the district suffered more heavily than any other in the province: Chhata and Muttra tahsils were most severely visited and their population was more than decimated.

The terrible effect of such an outbreak can hardly be estimated. Whereas plague only killed 69,000 persons in 10 years, this one epidemic carried off no less than 54,000, mostly in 4 months. In the report on the census of 1911 it is suggested that the prevalence of malarial fever in the district is partly due to the saturation of the soil, consequent on the raising of the water level by the extension of the irrigation system, and also to the absence of

facilities for drawing off the superfluous water. It is there stated that the Muttra drainage is sufficiently bad for an expensive system of drainage to have been built, which even yet is totally "insufficient, and this is especially the case in western Muttra. It is not surprising therefore to find a high fever rate : it exceeds the provincial rate by no less than 6.0. The average fever rate for the years 1901-11 is 34.1." It is doubtful however whether this suggestion is justified by the facts. When the Agra-Dehli canal was first introduced there is no doubt that the areas served by it did suffer from severe water-logging. But immense progress has been made in arterial drainage since then and except in certain well-defined areas there is but little reason nowadays to complain of supersaturation. These areas lie mostly along the main Agra-Dehli canal, and an investigation into the malarial conditions there prevalent has been suggested in a note drawn up by Mr. Dampier on measures to remedy the deterioration of the district.

One such area, Kosi, has already been investigated and measures are being taken to improve the conditions of the place. A description of these is given under the heading "Kosi."

There is some reason to suspect the existence of relapsing fever in the khadar villages at the north of Mat tahsil round Musmina. This question is now under investigation : some cases of this fever have also been detected among the sweepers in Brindaban.

There has been considerable fluctuation in the mortality from plague since 1908. After the bad year 1905 it steadily declined until 1909, when some 1,230 persons died from it : in 1910 it was far worse, the mortality being 8,635 ; but since then it has steadily declined. In 1912 only some 320 deaths occurred, most of these being accounted for by an outbreak in Kosi, which lasted from the beginning of February until the middle of May.

Plague.

Despite travelling dispensaries, and encouragement from the local authorities, the general attitude of the people towards inoculation is one of deep-rooted dislike.

Evacuation they regard with less hostility, but unfortunately they practise it so imperfectly that it loses more than half its value as a preventive measure.

The most noticeable feature of plague in the district is its constant tendency to recrudescence in a small but well-defined area in tahsil Chhata.

Page 43.—(middle).

Wells.

The numerous droughts which have afflicted the district in the last decade or so, and the shortness of the water-supply in the canals has had the effect of concentrating attention on the development of the well-irrigation.

The general characteristics of wells and well irrigation in the Muttra district has been described above, but the further enquiries made in connection with the proposals for remedial measures to check the deteriorated condition of the district have yielded some results which might be usefully placed on record.

Properly speaking, the three kinds of well in the district are—

- (1) *Pakka* wells, known as *gola*, with a thick well-constructed cylinder of ordinary bricks and masonry, sunk from the mouth of the well right down to the *mota*.
- (2) *Garwari* wells, that is to say, a *kachha* well with a lining through part or the whole of its length.
- (3) *Kachha* wells, pure and simple.

The first kind calls for no special mention. The second constitutes rather a feature of the district. The lining is made either of wood, fastened together as described above, or of large rough-baked earthen slabs. These slabs are of different shapes and are differently fitted together. The best are known as *gainchi*. These are curved flat slabs tongued at one end and forked at the other so that they can be fitted into a circular shape. When joints and courses are laid in mortar and the lining is carried up to the mouth of the well, the result is very nearly as good and durable as the *pakka* well. But in most cases the linings is only sunk from a few feet above the water level down to the *mota* and the upper part of the well is left to take its chance. The cost of *garwari* wells varies of course with the length and material of which the *garwari* is composed.

The limits are from Rs. 75, for a short cheap earthen or *farash* wood *garwari*, to Rs. 300 for a full-length mortar laid *gainchi garwari*.

Practically all *kachha* wells have a foot or two of twig lining (*ajhar*) at the bottom. But this is not counted as a *garwari* and is always referred to as *ajhar*.

The changes in water level that have occurred in the last fifteen or twenty years have affected the well system of the district considerably. The effect of the rise in water level in the cis-Jumna tract, due to the Agra-Delhi canal, has on the whole, been injurious. The evil is most noticeable in the Chhata tahsil. Here the rise has had the effect of rendering the water in wells, that were formerly sweet, entirely brackish. It would appear that the upper strata of the soil must contain saline deposits which, since the rise in the water level, have come within the percolation area, thus spoiling the quality of the original well water. The results to agriculture have been very serious in many villages, whole tracts that were formerly irrigated from sweet water wells, being now entirely dependent on rainfall. Experiments are being made with deep level borings to ascertain whether, by plugging the cylinders in such wells and tapping springs further down, it may not be possible to obtain a new supply of sweet water.

Another evil effect of the rise in the water level has been to render the shallow (*kachha*) well impracticable. Percolation commences long before the real springs are reached, and with the influx of the water the sandy sides of the well soon fall in and further well-sinking becomes impossible.

In the trans-Jumna tract, and more particularly in Mahaban and Sadabad tahsils the water level has gone on falling. It is common to see fine masonry wells perfectly dry, though in some cases the villagers have partly restored them by sinking a small *kachha* well with an *ajhar* inside the old well, down to the present spring level.

The Government has recently sanctioned a grant of Rs. 2,000 for experiments in well restoration. The usual method is to sink a *pakka garwari* well down to the new spring level and then increase the supply by borings to the next spring level below. So far the experiments have been attended with a fair measure of success.

Money is also being provided for the sinking of a well, from which experiments in lift-irrigation by a mechanically driven pump are to be carried out. There is no doubt that, in many parts of the district, the only hope of effectively protecting the brackish water areas is by erecting central pumping stations in the oases of sweet water areas which occur here and there, and pumping therefrom on to the brackish water tracts.

## CHAPTER II.

### AGRICULTURE AND COMMERCE.

*Page 44 (middle).*

The Agra Canal.

The Aring distributary has now been extended by the addition of 9 minors. These are—

1. The Gobardhan distributary with its branches, Paintha and Bachhgaon minors.
2. The Phondar distributary with its branches, Phondar minor.
3. Salisitra minor.
4. Ahmal minor.
5. Chalpara minor.
6. Rasulpur minor.

The last of these takes the place of the old Latakhur minor which has now been abandoned. The area irrigated, as a result of these extensions is roughly the tract lying west of the Aring distributary as far as the Bharatpur border, between the Muttra Dig and Muttra Bhartpur roads.

*Page 44 at bottom.*

The Bukharari distributary, the construction of which is stated on page 44 to be under consideration, has now been completed, very much in accordance with the outlines there given.

By these and other less important extensions the mileage of distributaries is now very nearly 400.

*Page 45 (at bottom).*

The canal bungalow at Hussaini on the Bukharari distributary is now completed. A new bungalow has been built at Sonkh on the new extension of the Aring distributary.

*Page 48 (bottom).*

at  
Sonkh.

A considerable extension of the system has been made by a number of distributaries running in an easterly direction, and

although these are at present very short, yet there is a fair increase in the acreage irrigated.

These new distributaries are the Bhureka, Lohi, Dandisra, and Mir minors taking off from the main canal, the Khaira minor from the Jarara distributary, and the Chotwa minor from the Sadabad distributary. In addition to these there is the Karab distributary with its branches the Pachawar and Sihora minors taking off from the main canal in a south-westerly direction, its total length being 9 miles. The total new area turns irrigated is 6,404 acres, consisting of 2,515 to the south-west and 3,889 to the east, irrigated by a total length of  $22\frac{1}{2}$  miles.

The new inspection bungalows have been built on the distributaries, viz. at Bisawar and Khanwal.

*Page 49 (middle).*

The scheme referred to on page 49 according to which the Hathras branch was to be supplied with water on alternate weeks with the tail portion of the Mat branch, was submitted to the Government in April 1908, the cost being estimated at Rs. 19,83,002, including direct and indirect charges. This scheme was however returned for further consideration, and it was finally determined that the Hathras branch main canal should be run as a constant channel, with alternate running distributary systems. By this change the capacity of the canal was reduced to by one-half and the cost reduced to Rs. 17,72,189. The main canal passes through a corner of the Mat tahsil for a few furlongs, in its head reach and again enters a corner of the Sadabad tahsil between miles 40 and 45.

The  
Hathras  
branch.

Irrigation will chiefly be carried out in the Sadabad tahsil and the whole area east of the Karwan nadi comes under the command of the canal.

Construction work was commenced in October 1909, and water was first let down for irrigation in December 1911. In tahsil Sadabad irrigation is now being carried out from the tail reaches of the Bisana distributary, Gajrauli distributary, and Barhar minor, the head 12 miles of the Sahpau distributary, Marhabhoj distributary, and the head  $2\frac{1}{2}$  miles of the Satrauli distributary, which gives a present total length of 42 miles. The Tamsi minor,  $1\frac{3}{4}$  miles in length, is under construction, and further projects for developing the area are under consideration.

Irrigation at present is small, but shows a satisfactory yearly increase.

Page 59 (middle).

Years  
since the  
famine  
1908-09.

In the year following the famine of 1907-08 the monsoon broke in the second week of June and in July was twice the normal amount and in August four times the normal. Owing to this some low-lying tracts were submerged, and some damage was done to standing *kharif* crops. The winter rains were sufficient and well distributed, but heavy rain in April 1909 did some damage. It allowed more land than usual however to be prepared for cotton. The total rainfall was nearly 41 inches or 22 inches above the normal.

1909-10. The rainfall was about normal, except in the spring of 1910, when it was slightly insufficient.

1910-11. Heavy rain in October 1910 damaged the *kharif* crops and they also suffered from white-ants, but this pest was put an end to by a good rainfall in January 1911.

1911-12. Although the monsoon broke in June 1911 there then ensued a complete break in the rains until the last week of July, and rain was not general until September. In tahsil Sadabad practically none fell until the third week in August. Famine was for a time feared, but the late rains prevented this. The *kharif* crop was less than half the normal amount, but the result of the delay in the breaking of the monsoon, was that more land was available for the *rabi* crops and that the fodder crops also did well. Consequently the *rabi* crop was unusually large, the increase over the normal being 26·76 per cent.

1912-13. There was really no rain until the first week in July, but when it came it was well distributed, and the *kharif* crop was normal. The winter rains were again sufficient but they came too late, as no rain fell in January at all, to make the *rabi* harvest a record one.

1913-14. The monsoon again failed almost completely, the normal fall for the months of June—September inclusive being 2·47, 6·79, 5·31, and 2·97 inches respectively and the actual fall 2·1, 4·71, 2·33, and ·55 inches. From June to December only 8·28 inches fell, as against a normal of 15·62 inches. The result was that the *kharif* crop was an almost complete loss in unirrigated districts. Another consequence has been a great

scarcity of fodder. Gratuitous relief was started on January 8th, 1914.

The areas which suffered most were Mahaban and Sadabad tahsils, and the Jumna cliff and western boundary tracts in the Muttra tahsil. *Tagavi* has been distributed in large quantities for the construction of wells, and for *bhusa*, and grass from the Government forests has also been given out as *tagavi*. At the time of writing the winter rains have also practically failed: the *rabi* crop is bound to be much below the normal, and some of that which has been planted is in danger of drying up, partly owing to the lack of rain, and partly owing to the insufficiency of the canal-supply.

*Page 63 (top).*

The firm of Gur Sahai Mal, Ghansham Das (Seth Radha Kishan) has since practically failed; it still does a few transactions, but these may almost be neglected. The Union Bank now has a branch at Muttra. The Kathiawar-Ahmedabad Banking Company also opened a branch, but as it failed to attract sufficient custom, it was closed after a few months.

Banks.

The enquiries instituted by Mr. Dampier in connection with his summary revision of the settlement of the district proved that shortage of capital was one of the causes of deterioration in the agricultural conditions of the district. With a view to remedying this defect it was decided to make an attempt to start village co-operative societies. With the assistance of a generous grant of Rs. 10,000, provided by Kunwar Mahendra Pratap Singh three banks have been organised in Chhota Kosi, Parkham, and Tos, and it is proposed to add three more to this number at Aring, Ral, and Borpa.

Co-operative  
Banks.

Some difficulty was experienced in obtaining a district executive committee that was ready to take upon itself the obligation of incurring financial liabilities for the money loaned to the village co-operative societies. Eleven public-spirited gentlemen have, however, now volunteered to serve on this committee, and the work can go forward. The Muttra cultivator is less intelligent than those of the Doab, and progress is therefore likely to be slow. But none the less, it is to be hoped that it will be sure.

## CHAPTER III.

## THE PEOPLE.

*Page 77 (middle).*

The cen-  
sus of  
1911.

The figures for the last census show a very considerable decrease in population : in 1901 it was 763,099, but in 1911 it had fallen to 656,310, a variation of 14 per cent. This latter figure is exceeded by Ballia with 14·4, but not approached by any other district in the province. The loss was chiefly felt in tahsil Muttra (—18·3), Chhata (—19·4), and Mahaban (—10·3).

Nor is the reason hard to find : it is clearly seen in the figures for the mortality from fever and plague in various years. The three years 1904, 1906, and 1908 show a total mortality from these two diseases of no less than 155,239, or nearly, 50,000 more than the total decrease in population during the decade.

In other years the mortality from fever was normal, and that from plague mostly negligible, but the result of three such terrible epidemics was bound to be reflected in the new census figures, and it is surprising that the decrease is not greater. Some improvement is no doubt due to the steady decrease in the number of deaths from malarial fever during the years preceding 1911, but it must necessarily be many years before the loss of nearly 54,000 persons from fever in 1908 can be repaired.

Religion.

The total numbers of both Hindus and Musalmans have naturally decreased with the decrease in the population, but the percentage figures have also changed. That of Hindus has only decreased slightly from 89·12 in 1901 to 89·08 in 1911 but that of Musalmans has fallen from 10·10 in 1901 to 9·41 in 1911.

The census also shows a considerable increase in the number of Christians, viz. from 2,262 in 1901 to 5,992 in 1911. Seeing, however, that in 1901 almost the entire cavalry regiment was on active service, the increase is not so great as at first appears.

*Page 117.*

News-  
papers and  
Presses.

The bi-monthly periodical, Nigam Agam Chandrika, is no longer published. The following newspapers, however, are now published in the district :—

1. Upanyas Prachar, in Hindi, printed monthly at the Madan Gopal Press, Brindaban,

2. Prem, in Hindi, published every Wednesday by the Prem Mahavidyala Press, Brindaban.

3. Bhargav Patrika, a monthly caste journal in Hindi, published by the Ram Narain Press, Muttra.

4. Acharya, a Hindi and Bengali bi-monthly paper, printed at the Fine Arts Press, Brindaban.

5. Krishna Chaitanya Chandrika, a monthly paper in Hindi, printed at the Fine Arts Press, Brindaban.

6. Banaushadhi Prakash, a monthly botanical magazine in Hindi, printed at the Sri Madan Gopal Press Brindaban. Of the presses mentioned on page 114, only the following are now working, viz., the Muttra Press, Shiamkashi Press, Aijaz Haidri Press, Star (branch) Press, Bombay Bhushan Press. There are however a number of new presses, ten at Muttra and four at Brindaban.

These are—at Muttra.

1. Ram Narain Press.
2. Branch of ditto.
3. Sukh Sancharak machine Press.
4. Union Press.
5. Sundar Singhar Press.
6. Mahamed Khan Press.
7. Dadru Vinashan Press.
8. Bharat Bhushan Press.
9. L. P. Nagar Press.
10. Educational Press.

And at Brindaban :—

1. Sri Madan Gopal Press.
2. Prem Mahavidyala Press.
3. Fine Arts Press.
4. Nalin Printing Press.

#### CHAPTER IV.

##### ADMINISTRATION AND REVENUE.

*Page 136 ?*

In accordance with Mr. Pike's scheme, the district has been divided into three sub-divisions, comprising (i) Muttra tahsil (ii) Chhata and Mat tahsils and (iii) Mahaban and Sadabad tahsils.

The sanctioned magisterial staff is one District Magistrate, three sub-divisional officers, of whom one is a Justice of Peace, and one treasury officer. In addition a junior civilian is usually posted to the district for training.

Honorary Magistrates :—

The number of honorary magistrates has now been increased by the addition of one in Chandwara.

Rai Chaube Ram Das Bahadur, who is a member of the bench in Brindaban, is now also a member of the bench in Muttra, and the members of the latter are therefore now eight instead of seven. There are at present only two honorary magistrates in Kosi.

*Page 160, top, after words—“ further enquiry is proceeding ”:—*

Summary  
settle-  
ment.

As a result of this enquiry, it was decided that the re-settlement of the whole district should be taken in hand as soon as possible. But since the preliminaries necessary for such re-settlement must take time, it was also thought advisable to order a summary revision of the existing settlement in the more deteriorated villages. The work of revision was entrusted to Mr. Dampier, the Collector: he commenced work in December 1911, and submitted his report in May 1912. The case of all villages in which the land revenue stood at more than 50 per cent. of the existing assets, as calculated according to the Board's settlement rules or which were reported to be seriously deteriorated, was examined. Two hundred and forty-eight villages, or 28 per cent. of the total number in the district, came under review. Mr. Dampier recommended a reduction of Rs. 65,049, affecting 298 mahals and 144 villages. The actual reduction sanctioned by the Government, on the recommendation of the Board, amounted to Rs. 57,014. Some of the reductions were made conditional on landholders reducing their tenants' rents; these conditions were generally accepted, but in a few cases, the landholders refused. The actual reductions made amounted to Rs. 54,701, a decrease of 26·17 per cent. on the revenue of the villages affected and of 3·69 on the total revenue of the district. This latter now stands at Rs. 14,24,164 as compared with Rs. 16,28,094, originally assessed.

In the meantime preparations for the regular revision of the settlement were pressed on. It was decided that there was to be a revision of records, and as a preliminary to this the village maps had to be corrected. Field work was commenced in the Mahaban and Sadabad tahsils under the superintendence of Mr. A. W. Ibbotson, in January 1912, and completed by the end of the hot weather. During the rains, the re-numbering and tracing of the maps of these tahsils were carried out. Map correction in the Chhata and Mat tahsils was taken in hand early in the cold weather of 1912-13, while in the Mahaban and Sadabad tahsils, all the preliminaries necessary for attestation of records were completed.

In September 1912, the Board submitted a detailed programme of re-settlement to the Government; this provided for a settlement officer for three years from October 1st, 1913, with an assistant settlement officer to help him in the third year. In the meanwhile however a change had occurred in the headship of the province, and the Board's final proposals came before the new Lieutenant-Governor for sanction. He decided to cancel the orders for an immediate settlement. The grounds for this decision may be briefly summarised as follows \*:—

Under previous orders, the period of the settlement had been extended to 1920—23, while under the Board's proposals the new *jamās* would be ready some four or five years before that date. It would therefore be possible to bring the new *jamās* into force only in those mahals in which there was a decrease, while on the mahals in which there was enhancement, the Government would have to wait for its increase in revenue until 1920—23. The settlement would in any case, be of a costly nature, and the Government would gain no corresponding increase in revenue for several years.

The re-settlement of the district had however been urged on other grounds, such as over, assessment, inequality of assessment as between mahal and mahal, inaccuracy of records, and necessity for adjustment of rents. The Government were of opinion that all serious cases of over-assessment must have been dealt with in the course of the various intermediate revisions: that the

---

\* G. O. No. 23921/I—581 of December 5th 1912.

inequality of incidence of assessment was largely conjectural, and that the third and fourth difficulties could be dealt with by a mere revision of records. In any case, the Government did not consider that a re-settlement was likely to assist the district to recover from its present distressed condition. They suggested that defects in the records could be met by strengthening the district staff, and they called for definite proposals from the Commissioner, for remedying the depression in the district. These were to be submitted before the cold weather of 1913-14.

Some further correspondence passed between the Board, the Director of Land Records, and the district authorities on the subject of the correction of the records. It was finally decided that the correction of maps in Chhata and Mat tahsils which was well advanced, should be completed, but that of Muttra tahsil should be postponed until nearer the time of the regular re-settlement. As regards the actual records, it was found that no good purpose would be served by attempting to deal with them piecemeal through the agency of the district staff, but that it would be wiser to defer action on the matter of their correction, until a regular attestation of records could be carried out in connection with the regular re-settlement.

The survey and settlement office was finally closed at the end of August 1913. The direct results therefore of the proceedings during the revenue years 1911-12 and 1912-13 have been to reduce the land revenue of the district in the deteriorated areas by Rs. 54,701, and to provide all the tahsils except Muttra tahsil with complete and up-to-date maps. The cost of the proceedings amounted in all to Rs. 27,850.

Indirectly, other advantages have accrued from the enquiries necessitated by this work. In particular the main causes that have led to the deterioration of the district have been explored. A full account of these causes, and of the remedies that appear available, is given in Mr. Dampier's summary settlement report of May 1912 and in his note on the remedies for the deterioration of the district, submitted to the Government in December 1913.

*Page 166 (bottom) ?*

Post  
Offices.

The number of post offices in the district has now been increased to 42, composed of 1 head office, 16 sub-offices, and 25

branch offices. Muttra itself has now 4 sub-offices and 4 branch offices, besides the head office.

*Page 168 (top).*

It would appear at first sight that the finances of the Muttra municipality are in a very bad condition, since the annual figures show a balance on the right side only in the years 1909-10 and 1912-13, during the last six years. The fact that of late years the annual expenditure has as a rule exceeded the income, is largely due to the rapid increase in expenditure on public works. Such an item as the building of shops in the Calnanganj inevitably must leave a deficit on the year in which the expense was incurred, but the income accruing from it will be spread over a number of years and will not be so apparent. This increase in expenditure on public works is very marked and whereas the average annual charges under this head were only Rs. 7,251 for the six years ending with 1906-7, the average for the next six years was no less than Rs. 19,395, with a total expenditure of Rs. 1,16,392 against a previous total of Rs. 43,516.

Municipalities.  
Muttra.

In the face of these extra charges, the municipality has, in a number of years, been forced to draw on its accumulated balance. During the years 1908-12 this steadily decreased from some Rs. 30,000 to about Rs. 8,000. Latterly however this decrease has been checked in 1912-13; there was a surplus of Rs. 5,072 and for the past financial year the balance is even greater; in a short time therefore it is probable that the reserve will be restored to its previous figures.

Of late years the finances of the municipality have somewhat improved. The average income since 1907 has been Rs. 24,619, and the average expenditure Rs. 24,386. In view, however, of the expensive drainage scheme which is now under consideration, this income must be considerably increased, if the work is to be commenced. The financial aspects of this scheme are dealt with under the article "Brindaban" in the directory.

Brindaban.

On April 1st, 1914, Kosi ceased to be a municipality and became a "Notified Area." Its affairs will in future be managed by a committee consisting of a president and three members, all appointed by the Government. The octroi tax will be abolished,

Kosi.

and a new property tax substituted for it. In addition to this proposals have been submitted for doubling the present fee of 1 anna per head on cattle sold in the market with a view to recouping the loss on octroi still further.

Act XX  
Towns.

All these towns have now become subject, since April 1st, 1914, to the Town Areas Act, 1914.

*Page 171 (middle).*

Educa-  
tion.

At the present time the number of schools in the district has risen from 204 to 221, 17 new aided schools having been opened out of existing funds; nine aided schools were also made board institutions by means of a grant from the Government. Forty-six assistant teachers were added to the staff of primary schools and there was consequently a rise in expenditure, but as for the first time the inspecting staff was in 1912 paid from provincial funds, the rise in expenditure was not so great as it otherwise would have been; in fact this increase was only from Rs. 41,209 to Rs. 42,573.

The number of scholars has risen from 9,623 to 10,774 and the income from fees from Rs. 2,300 to Rs. 2,808. These figures do not, however, indicate a great increase in literacy, for it is found that there is a practice of dragging a number of children into the lowest class of a school, in order to improve the statistics. These extra children soon fall off again, and thus the actual number of those who can read and write does not increase greatly.

For the purpose of preparing children for examination the difficulties seem to be (i) that the staff is still inadequate and (ii) that some of the teachers are old and inefficient. To remedy the first defect, more funds alone are needed, but to meet the second, it is essential that the older men should be removed and younger and more energetic men introduced.

A further grant of Rs. 1,800 has been made for the construction of a new lower primary training class which is to be opened at Chhata; it is at present housed in a temporary building as no suitable site has yet been found.

Boarding-houses, where they exist, are without exception most inadequate. Lack of funds has been the great obstacle to improvement in school-building. With the more generous treatment that district boards are now receiving it will be possible to make up much leeway. New middle schools are projected at Muttra and

Chhata, the old Shergarh middle school being abolished. It is possible also that a new middle school will be required at Surir, when that place becomes the head quarters of Mat tahsil. The rebuilding of the Raya middle school is also down on the district board 13 years' programme. This includes both school and boarding-house. New boarding-houses are also proposed at Aring (or Gobardhan if the town school is transferred to that place) and Mahaban, but no money is at present available for these from district board funds. Another grant of Rs. 18,000 has, however, been recently sanctioned by the Government for the rebuilding of town schools. This grant will probably be allotted as follows:—

			Rs.
Muttra (school)	...	...	... 3,000
Chhata (school and boarding-house)			... 7,000
Gobardhan (ditto ditto )	...	...	... 6,000
Sadabad (school)	...	...	... 2,000

As regards the general progress of education in the district the outstanding feature is the lack of interest taken in the subject west of the Jumna. The Jat of Chhata is still a Boeotian as Mr. Growse found his father, but the Jat of Mat has been very considerably affected by the educational keenness of his brothers in Aligarh and Bulandshahr and also to a lesser extent by the Arya Samaj movement. In view of this marked difference, the programme which it was suggested should be drawn up, providing within the next ten years, for a school within one and a half miles of every village, would need considerable modification in this district. It would be most useful in the whole of Mat tahsil, except in the extreme north-west, but if extended to Chhata tahsil, it would involve an unjustifiable waste of public money.

*Page 172.*

The census of 1911 shows a more considerable increase in literacy among males, although that among females is very slight. According to the returns for that year the literate male population amounted to 9·1 per cent of the whole, this being nearly 3 per cent higher than the figures for the province of Agra. The percentage of literate women, however, which in 1901 was ·32 had only risen to ·34 during the ten years. Of the total population 5·45 per cent are now able to read and write as against 4·32

Literacy.

per cent in 1901. The figures for the two predominant religions are respectively Hindus males 9.3 and females .73, and Musalmans males 5.12 and females .54.

*Page 173.*

Dispensaries,

Two new dispensaries will shortly be opened, one at Gobardhan and the other at Surir.

There are also two travelling dispensaries in the district. One is a district board dispensary under the charge of the Civil Surgeon, and the other, at Mat, is paid for from provincial funds and is under the supervision of the medical officer of Aligarh.

Cattle Pounds.

Six new pounds have since been opened, bringing the total up to twenty-five. The new pounds are at Kosi khurd in tahsil Muttra; Sei and Barha in tahsil Chhata; Behri in tahsil Mat; and Gokal and Panigaon in tahsil Mahaban. The income derived from them fluctuates very considerably, the year 1909-11 having been most productive, but the average for the last years is Rs. 6,165.

### DIRECTORY BRINDABAN.

*Page 249 (top).*

Temples.

The Maharaja of Jaipur's temple has not advanced any further, being still in an incomplete condition.

A new temple has just been constructed, namely that of Babu Tara Kishor Chaudhri, which abuts on the road behind the Maharaja of Jaipur's temple.

*Page 250 (middle).*

The anglo-vernacular school has now been abolished, and the building is at present used as an upper primary school for boys. The municipality has recently opened another girls' school, and also a school for the depressed classes. By the generosity of Kunwar Mahendra Pratap Singh of Hathras another school has been established, styled "Prem Maha Vidyalaya." This is on a more ambitious scale, and is devoted to technical education, which is given free of charge. There are at present about 300 students attending it, this number being drawn from all parts of India. Another institution of importance is the Gurukul, which was transferred from Farrukhabad some two and a half years ago by the Arya Samaj community. The system of

education is practically the same as that in force at the Kangri Gurukul near Hardwar. The building is still under construction and lies near Rajpur about half a mile beyond the city boundary. Within the city itself the Arya Samaj has no influence.

Besides some private Pathshalas for primary education the Acharyakul and Rishikul are worthy of note. They were established by some leaders of the orthodox party a couple of years ago, and are run on much the same lines as the Gurukul. Other schools which coach students for higher examinations in Sanskrit are the Rang Lakshmi Vidyalya, the Cawnpore Wali Pathshala, and the Hitkul Pathshala.

In addition to the Government dispensary, built in 1886, a second dispensary, the Seva Ashram, has since been opened; this is largely used by poor Bengalis. The Methodist Episcopal Mission has a third dispensary in the Missionaries' compound.

Dispensaries.

Of recent years several dharamsalas have been built at the following places :—

Dharamsalas.

1. Bazar Gopi Nath, built by Dhama Bai.
2. Galbind Bagh „ Narain Das Benarsi Das.
3. Muttra darwaza „ Sohan Lal Punjabi.
4. Ditto „ Tilok Chand Hari Ram.
5. Railway station „ Tejpal Jumna Das.

The last of these is not yet complete. The need of these dharamsalas has long been felt, and it is owing to the public-spirited generosity of the gentlemen named above that it has now been supplied.

The Brindaban drainage scheme, which has been under consideration for some years, now appears to give reasonable hopes of its being carried into effect. It has long been realised that the city is in a most unsanitary condition, this being largely due to the pilgrims who visit it in large numbers every year. Lack of funds, however, had always been a great hindrance to the carrying through of any project as it was felt that no partial scheme would be of any use, and the cost of a complete scheme was prohibitive, unless very generous grants were made by the Government. Another difficulty was the problem of finding suitable outlets for the sullage into the river; owing to the number of ghâts at Brindaban, sullage could not be allowed

Drainage scheme.

to flow out at places where it would pollute the water used for bathing. One scheme was prepared in 1907, but this was ultimately abandoned owing to lack of funds. This provided for four main drains, but as three of them might possibly have polluted the ghâts,—although this was provided against except in abnormal years—it seemed impracticable on sanitary as well as financial grounds.

Now, however, a special appeal has been issued to those ruling chief and raises who have an interest in Brindaban; this has produced some Rs. 10,000, and the Government has also granted half a lakh towards the drainage. A revised scheme has been prepared. This allows for only one outfall, below all the ghâts.

As before, there are four main drains serving the different quarters of the city, and eventually uniting near the municipal bungalow. At present the scheme is not entirely worked out for the drainage of the smaller streets, but that will be a comparatively small matter when the main scheme is complete. Some difficulty will at first be met with in arranging for the disposal of the sullage; except in the rains there will be no water sufficient to carry it off, and a sewage farm will ultimately be needed, but in the meanwhile some other arrangement will have to be made.

The cost of this scheme is estimated at Rs. 2,04,316, and even that sum includes no provision for some of the smaller drains (as mentioned above) for the disposal of effluent or for flushing the drains. One lakh is required for starting the work, and it is at present not easy to see how this sum can be obtained. It has been several times proposed that a pilgrim tax should be imposed, which, it is estimated, would bring in Rs. 12,000 or Rs. 15,000 annually; but the Government have hitherto declined to sanction it. If such a tax cannot be sanctioned now, it is hoped that the Government will make a further grant of Rs. 50,000; for without the tax or the grant the work cannot be commenced. Considering the great need of efficient drainage in Brindaban, and also the fact that a drainage scheme is projected in Muttra, the health of the two cities being, as the Sanitary Engineer reports, closely related, it would be a great pity if the two schemes were not carried out side by side.

## P. 262. GOBARDHAN.

A considerable extension of the buildings of Gobardhan is now in progress. In December 1912 the Shrimati girls' school was opened. This is the gift of Kunwar Man Singh, Rais of Lakhnau, district Aligarh, and Pandit Ram Chandra of Gobardhan. In addition to this a new hospital is now in course of construction just outside the town on the Dig road: this was given by Seth Baldeo Das.

Gobar-  
dhan.

A new orphanage is also being built near the hospital. It is probable also that the middle school will be moved from Aring to Gobardhan, in which case a new building will be erected to accommodate it.

. Kosi, page 271 (*middle*).

As noted elsewhere, Kosi has since April 1st, 1914, been reduced from a municipality to a notified area.

Kosi.

The number of schools has been considerably increased, there are now five (four for boys and one for girls). The last of these was founded about 1911 by the managers of the Jain temples. In addition to these the joint committee of the District and Municipal Boards have decided to open two more schools in Kosi. These are to be—

1. A Muhammadan boys' school in the Muhammadan quarter.
2. A girls' school with a Hindu mistress, but open also to Muhammadans.

They will be maintained by a grant of Rs. 275 per annum recently made by the Government to the municipality, and managed by the District Board.

The cotton trade with Bombay continues in a flourishing condition. There are now 13 ginning mills and presses at work employing over 1,000 hands.

Cotton  
trade.

The population has still further decreased and according to the census of 1911 amounted to only 7,188, there being only a slight preponderance of males over females. The proportion according to religions remains about the same.

Popula-  
tion.

A new dharamsala with a temple and garden is under construction in front of the railway station. This is being built by Lala Moti Lal of Kosi, and is a *pakka* building. At present the

Dharam-  
shala.

garden has been planted and the buildings are in course of construction.

Akbar  
Sarai.

The project for converting part of the Akbar *sarai* into a Ganj has now received the necessary sanctions and the district engineer has been requested to take the work in hand at once.

Municipal  
farm  
experi-  
ments.

These experiments were not a financial success; the chief things cultivated were potatoes and tobacco, but as the loss was Rs. 460 in 1911-12 and Rs. 278 in 1912-13, it is proposed to give up the experiments, and to hand over the fields to local tenants at a reasonable rent.

Flour  
mills.

During the last year a flour mill was also opened in Kosi; being the only one in the town, it attracts considerable custom.

Malarial  
fever  
experi-  
ment.

Kosi has been selected as one of the localities in which special anti-malarial measures are to be undertaken by way of experiment at the expense of the Government.

In the rainy season of 1911, Major Graham, I. M. S., chief malaria officer, made a detailed malarial 'survey of the place. As a result of his report a special committee was convened at Kosi in May 1912, consisting of the Collector of the district, the Sanitary Commissioner, the Sanitary Engineer, the Executive Engineer of the Lower division, Agra canal, and Major Graham, to submit proposals as to the best means of giving effect to Major Graham's suggestions, and of improving the hygiene of the town. The committee recommended the further filling up of the chain of insanitary tanks that surround the town, the re-alignment and regrading of the Kosi municipal circular drain, the lowering of the bed of the canal so as to enable storm-water to be diverted from the municipal drain into it during the monsoon period, the diversion of the Kosi branch drain, the filling up of all borrow pits, and the enlargement of the municipal boundaries, so as to prevent the digging of fresh borrow pits in the neighbourhood of the town, and sundry other minor experiments. The Government accepted the recommendations of the committee in the main, and an estimate of Rs. 1,45,965 was prepared. The main items in this are as follows :—

- (1) Lowering the bed of the main canal Rs. 35,553.
- (2) Filling tanks and hollows Rs. 32,793.

(3) Masonry lining to Kosi municipal drains (?) Rs. 43,866.

(4) Diverting Kosi branch drain Rs. 25,359.

The work is being carried out by the Executive Engineer of the Lower division, Agra canal.

The municipal (now notified area) boundaries have been extended and other minor improvements recommended by the committee are being undertaken.

*Muttra City, page 292.*

Since 1908 the number of inscriptions, sculptures, and other exhibits acquired for the museum from the locality has been considerable. No museum in India has been so greatly enriched by the acquisition of valuable antiquities (many of them being examples of Greek art) as the Muttra Museum has been during the past few years. In the course of the year ending March 31st, 1908, the number of sculptures rose from 350 to 576, exactly one tenth of the number being inscribed; these finds were considered by the officers of the Archaeological department to be unique and of great value to the study of epigraphy.

Archaeo-  
logical  
discove-  
ries.

In the year 1911 the archaeological excavations yielded, among other discoveries, a number of the earliest inscribed bricks hitherto unknown (?) in India. Among the acquisitions, which included a large number of ancient gold and copper coins, and fine inscribed objects, a most interesting discovery was made of an inscribed sacrificial pillar. This has been described in the report of the archaeological survey for the year ending March 31st, 1911, in the following terms :—

“This year had brought to light an inscription which has proved to be of the highest importance for the Seythian period of Indian history. It has established beyond doubt the fact that between Kanishka and Huvishka, the great Kushan rulers, there reigned a Sovereign of the name of Vasishta, whose authority was acknowledged at Mathura. It was found by Pandit Radha Krishna at Isapur, situated on the left bank of the river Jumna, opposite the Visrantghât, and has now been deposited in the Muttra Museum.”

The year ending March 31st, 1912, was also fruitful in interesting and valuable discoveries.

The site at Ratora was excavated, and two complete inscriptions of the Kushan period and many other interesting relics,

including some architectural remains, were discovered.

The second undertaking was the excavation of the site near Mat village. The mound at Mat had never before been noticed by archaeologists. Its excavation resulted in the finding of life-size statues of the three Kushan kings.

One of them is a standing figure of King Kanishka. It bears an inscription in early brahma character, which reads thus : "Maharaja Rajit Raja Devaputra Kunishka"—"The king of kings the heaven born Kanishka." The second statue is also in a standing position but has no feet. This also bears an inscription but is rather fragmentary. The dress and general appearance prove it beyond doubt to be of some Kushan king.

The third is in a sitting position, and of great size, being far larger than the statue of Kanishka or the torse just mentioned. The inscription on this statue is one of five lines, and gives all the titles of an ancient king. The figure is dressed in Greek costume. Unfortunately the inscription is somewhat obliterated in one line where the name of the king was incised. It is evidently the statue of a king who is unknown to history, some predecessor of Kanishka.

In addition to these statues seven inscribed brasses, two inscribed sculptures, and about seventy other antiquities of importance were added to the museum.

During the year 1912-13 the work of discovery has gone on and eight important inscriptions, many sculptures, and a few brasses of antiquarian interest have been placed in the museum. The latest discoveries were made when cleaning wells : these yielded two more inscribed pillars of the pre-Kushan period ; one has a complete inscription and the other only a few letters. The style is Graeco-Bactrian and one of the two, a frieze to go over a door, is a good example of the style of that time. There is no doubt that many more antiquities could be obtained both from the cleaning of wells and from the excavation of the many spots in which heads of statues have been found, the statues themselves not having been brought to light.

The existing museum building is much too small for the exhibits which it possesses. The necessity for extension has now been accepted and it is hoped that funds for the work may be allotted

before long. Meanwhile a proposal has been made for rebuilding the tahsil a short distance to the south, and utilising the existing buildings as a temporary museum until the extension has been carried out.

*Page 307.*

A notable addition to the buildings of the city has been made by the construction of the Calnanganj grain market, at a cost of over a lakh of rupees. This was formally opened on May 21st, 1912, and consists of sixty-three shops, built partly by the board and partly by the banias themselves: all these shops are now occupied. The ganj is situated on the Holi darwaza and Dig road. Although the cost was heavy there is every reason, in view of the popularity which the ganj has already achieved, to regard the outlay as a profitable investment.

The Dampier park behind the Victoria memorial garden, on the Agra road, has also added to the amenities of the city, and it is to be extended considerably to provide more room for tennis, hockey, and other games.

Another matter of great importance is the new water-works scheme. Considerable delay has been experienced owing to the difficulty of finding a suitable site for the supply wells, but sanction has now been given to the scheme. The water-supply of Muttra is at present derived from two sources, *i.e.*, from wells in and around the city, and from the river. Unfortunately, most of the wells are brackish, and are further rendered unfit for use owing to the large accumulation of dèbris, the remains of houses built by successive generations. The result is that the inhabitants on the ridge, which is the most densely-populated part of the city, are now obliged to purchase their water from water-carriers and it is estimated that between forty and fifty thousand rupees are spent in this way every year.

In order to remedy this defect a scheme for supplying water from deep spring or percolation wells has now been sanctioned at a cost of Rs. 3,98,190. The site for the wells will be near the terminus of the old Navigation Canal, locally known as the Lal Diggi. The water will be pumped from these wells into two balancing tanks at Manoharpura from which it will gravitate into two mains for distribution in the city. Provision will thus be made at

the rate of 20 gallons per head for 50,000 inhabitants, and three gallons per head for 100,000 pilgrims.

Side by side with this scheme, an extensive drainage scheme has also been taken in hand, which is expected to cost three *lakhs* towards which the Government has contributed two *lakhs*. This scheme has been sanctioned, but work has not yet commenced.

The present hospital building is of a very inferior type. Sri Gordhan Lalji Goswami Maharaj of Nathdwara has generously given a donation of Rs. 50,000 in comemoration of his Banjatra pilgrimage in 1912. With this, and possibly some further subscriptions it is hoped to extend and beautify the present building, so as to make it more worthy of a city of the importance of Muttra. Plans and estimates for the work are now in preparation.

				1 cub	2		
1910	..	20	200	78	780	56	112
		1 cub	2	18 cubs	36		
1911	..	64	640	384	3,840	80	160
		11 cubs	22	32 cubs	64		
1912	..	20	200	14	140	23	46
				2 cubs	4		

The large decrease in the number of wolves destroyed is due to the measures taken to ensure that rewards were only paid for animals killed in this district. The Kanjars who had been making a good living from rewards, removed themselves elsewhere when their source of income was so considerably curtailed.

## Agra district.

## Pages 18 and 19.

Enumeration of cattle was held in 1908-09, with the following results:—

District.	1	2	Bulls.	3	Cows.	4	Male buffaloes.	5	Cow buffaloes.	6	Calves.	7	Sheep.	8	Goats.	Horses and ponies.				13	14	15	16	17
																Horses.	Mares.	Tattoo (male).	Tattoo (female).

Total	..	..	11,214	58,508

*Page 41.—CANALS.*

At present there are two main canals.

- (1) Agra canal, Lower division.
- (2) Ganges canal, Aligarh division, with two branch divisions.

(a) Hathras Branch division, opened in 1911-12.

(b) Mat Branch division, running in 1910-11, but not in 1911-12.

The Jugner tanks were opened in 1910-11, the water rates are credited to the Agra canal receipts.

The Bharatpur State canal at Kiraoli is under construction.

Receipts are as in the attached statement.

## FAMINE OF 1905.

Page 48.

The rains of 1905 were intermittent, deficient in quantity and unequal in distribution. This was followed by a severe frost which seriously damaged the *rabi* harvest.

The rain failed when it was most wanted and especially in the Jugner tract of the Kheragarh tahsil, the brackish water village in Kiraoli and the eastern portion of Bah. In these parts not only was there an almost complete failure of the *kharif*, but no prospect of sowing the *rabi*.

Takavi to the amount of Rs. 15,668 was distributed in these tracts and at the same time remissions and suspensions of revenue were granted to the land holders with the subsequential relief in rent to the tenants.

The condition of the people was unfortunately made still worse by the prevalence of fodder famine and even by the beginning of October cattle were being fed on the leaves of trees and shrubs. Famine was declared on 15th in Bah, Kiraoli and Kheragarh and lasted till 30th September 1906.

The works started in Bah failed to attract many people, the explanation apparently being that many of the population had emigrated to the irrigated tracts of Mainpuri and Etawah. The largest number of persons on gratuitous relief was 480 on July 7th, 1906.

In Kiraoli the highest number of labourers employed on relief work at Fatehpur-Sikri was 648 in the fortnight ending June 23rd, 1906, and the work was closed on 14th July.

The highest number on gratuitous relief was 955 on July 7th.

In Kheragarh the number of persons on gratuitous relief was 1,100 in the first fortnight of famine operations.

The number rose gradually to 1,269 by 7th July and after the closing of relief works rose to 1,600 on August 18th, 1906.

The number of persons on the various relief works in the tahsil rose to 4,626 on June 23rd.

The distress was never very severe and there was no tendency among the workers to remain on the relief works after the monsoon was once established. The number of units actually relieved was 680,563.

Rupees 18,40,000 was granted as takavi for the purchase of plough cattle to replace the stocks so sadly depleted.

A grant of Rs. 25,000 was also received for the same purpose from the Indian People Trust Fund.

No poor houses were opened. The expenditure on famine relief operations in the Civil department was Rs. 48,460-1-0.

The remissions of land revenue for the two harvests amounted to Rs. 4,42,560 and the suspensions to Rs. 25,262.

Rupees 64,863 were remitted on account of the damage to the *rabi* of 1905.

#### FAMINE OF 1907-08.

The monsoon of 1907 was a failure, the rains did not break until the end of July and agricultural operations were much delayed. Thereafter good rain fell till 24th August when it stopped absolutely, but winds then blew continuously and completely withered the crops in irrigated areas.

Scarcity was declared on 18th December and famine operations were begun on 18th January when gratuitous relief was started. Famine was declared on 12th February. Test works were started in the three tahsils of Bah, Kheragarh and Kiraoli. The work in Bah proved unnecessary and was closed on the 1st February. The 14th March, just before the harvesting of the *rabi* which had been benefited by copious winter rains, was the date on which the greatest total on the relief was reached, namely 20,468. Poor houses were closed in March; all relief works were closed in May, a civil work attracted no one and aided works were closed and accounts adjusted on 20th June. Gratuitous relief ceased everywhere except in the Jugner tract where it lasted on until July.

The total number of units relieved was 2,352,328 and the total cost of famine relief operations was Rs. 1,72,129-1-3.

Rupees 3,59,426-15-3 of land revenue were remitted and Rs. 1,82,191-11-1 suspended for the two harvests. Rupees 12,90,041 were granted as takavi.

The famine was unfortunately followed by a very severe epidemic of malarial fever which caused a very high rate of mortality and further crippled the agricultural population.

Page 49.

Prices of food grains have been as follows :—

Year.	Wheat.	Barley.	Gram.	Juar.	Bajra.
1901 .. ..	12.49	18.28	17.65	18.80	17.80
1902 .. ..	13.70	18.41	17.70	18.20	17.45

1910 .. ..	11.33	17.49	16.30	16.86	15.00
Average for 1901-1910	11.75	17.69	15.96	17.40	16.24

Since 1910 prices have fallen slightly.

## WAGES.

Average wages of agricultural labourers are —

Man Rs. 7-8-0, woman Rs. 6, children Rs. 4 per mensem ; carpenters Rs. 15, blacksmiths Rs. 15, masons Rs. 15.

Factory wages as given in the factory report for 1910-11 are—

Skilled Rs. 10 to Rs. 20.

Unskilled Rs. 6 to Rs. 8.

„ women Rs. 4.

## Page 51.—BANKS.

Sah Mohan Lall of Semra is dead. His son Sah Durga Prasad continues the business.

Chaubey Radha Mohan is dead. His son Sudershan Lall continues the business. The only village banks in existence now are at Jarauli and Kotla. The others mentioned on page 51 are closed.

Ten Co-operative Credit Societies were opened in 1912.

Six are financed by the Court of Wards, Bhadawar State, viz. at Mai, Fatehpura, Lukhanpura, Pai, Garhia Partabpura and Kalkapura, and four are financed by the Parna Organization Fund, viz., at Naipura, Mukatpura, Kukapure and Parna.

## Page 57.—FACTORIES.

There are 19 factories under the Factories Act in the district. Of these six are owned or run by Messrs. John & Co., and are all

ginning, spinning, pressing or weaving mills. There are five other ginning and pressing mills, and one spinning factory and one leather works in Agra city.

In Firozabad there are five ginning mills and one has recently been started in Fatehabad.

*Page 58.—FAIRS.*

LIST OF MOST IMPORTANT FAIRS.

*Agra city.*—Moharram, Dasehra, Kamal Khan (Chak II) and Pachkuian (Chak I).

1914.

## *Alterations and Additions to Part A of the Mainpuri District Gazetteer, bringing it up to date (1913-14).*

### *Pages 32 to 34.—VITAL STATISTICS.*

In the years 1909, 1910 and 1911 also the death rates were high and the birth rates low. Malaria epidemic continued in the year 1909 and the death rate, though it had fallen from 53·70 in the year 1908 to 46·14, yet it was abnormal as compared with the years 1891 to 1907. The birth rate in the year 1909 per 1,000 was only 38·283. In the years 1910 and 1911, though the death rates were comparatively higher but the birth rates also had improved.

#### FEVER.

Mortality from fever in the year 1909 was also very high. 35,721 deaths were ascribed to this cause. Speaking generally the epidemic of 1909 of itself was a mild one though the chronic cases from 1908 swelled the numbers considerably. The large majority were suffering from anæmia and enlargement of spleen with occasional attacks of fever throughout the year. In the year 1910 and 1911 the figures showed a return to normal.

#### PLAGUE.

After the year 1905 when 10,836 deaths occurred from plague the disease was again severe in the year 1911 and it carried off 7,027 souls. It was extremely virulent in the months of February to April 1911, especially in Police Circles Sirsaganj, Eka and Kuraoli.

#### OTHER DISEASES.

In the year 1910 there were 105 deaths, due to bowel complaints, the highest figure on the record in this district.

### *Page 70.—VILLAGE BANKS.*

The Bank has made great progress and has gained the full confidence of the public. There is now no lack of capital. The share capital of the District Co-Operative Bank, Mainpuri, is Rs. 35,890, half paid and half unpaid. Its working capital in the year ending the 30th June 1912 was Rs. 1,38,668 and its reserve fund Rs. 6,499. It has been paying a dividend of Rs. 8 per cent. to its shareholders for the last three years. The number of village

co-operative societies has increased to 120, all of which are established on the share capital system. The number of members of these societies is 3,569, their paid up share capital Rs. 14,973 and their reserve fund Rs. 11,259.

#### FLOUR MILLS.

There is a tendency to start flour mills; two having been started in Mainpuri itself and one in mauza Alipur Patti of tahsil Bhongaon. Oil engines are used in these mills.

#### Page 78.—INSPECTION HOUSES AND SARAIS.

Dharamshalas also come within the provisions of Sarais Act. There is a good dharamshala in Mainpuri which has been built by Musammat Savitri of Farrukhabad.

#### Page 102.—PRINTING PRESSES.

One more periodical has been started in the Mainpuri town, it relates generally to the social improvement of the Gaur community of Brahmans.

#### Page 113.—DISTRICT STAFF.

##### Line 7.

A new Honorary Magistrate, L. Madho Narain, was appointed in 1912. He sits at Madanpur and exercises jurisdiction in the Sirsaganj Police Circle.

There is also an Honorary Assistant Collector, M. Ahmad Husain, a retired Tahsildar, who sits at Dulpura in tahsil Bhongaon.

##### Line 4.

The staff as sanctioned under Mr. Pike's scheme consists of three Deputy Collectors with full powers and a Treasury officer.

##### Line 16.

Under Mr. Greeven's scheme, Etawah, in the Mainpuri Judgeship, has now (1913) been given an Additional Sub-Judge and the Sub-Judge of Mainpuri now holds the powers of an Additional Sessions Judge for the Etawah and the Mainpuri districts.

##### Line 22.

Strike out reference to the Opium department.

#### Page 114.—OPIUM DEPARTMENT.

Strike out reference to the Opium department.

*Pages 105 and 106.*

Thakur (now Raja) Kushal Pal Singh has now got the title of Raja from the British Government. He is a member of the Lieutenant-Governor of United Provinces and Oudh's Legislative Council and also of the Imperial Legislative Council.

*Page 114.—VILLAGE MUNSIFS.*

The list of circles has since been revised and there are at present 41 village munsifs. In the calendar year 1911, 1,509 cases were disposed of by them.

*Page 132.—POLICE.*

The cost of the Police in Act XX Towns has been made chargeable to Provincial Funds since 1911-12 and a contribution equal in amount to this cost is made to the town funds. The result will probably be a great improvement in the sanitation and lighting of Act XX Towns.

*Page 132.—POLICE.*

*Line 5.*—One hundred and sixty-five constables instead of 330.

*Line 6.*—Eight sub-Inspectors instead of seven.

*Line 7.*—Sixty-five constables instead of 17.

*Line 8.*—Twenty-three head constables instead of 20.

*Line 8.*—One hundred and thirty constables instead of 127.

*POLICE STATIONS.*

*Line 8.*—There is at present no thana at Mustafabad, but the thana of Jasrana will be abolished and a new one will be built at Mustafabad according to Mr. Hoskins' scheme. The building has been sanctioned but the funds are not yet available.

*Line 11.*—Commencing from "these circles" to "Jasrana" in the 13th line should be omitted as the circles were redistributed in 1908.

*Line 14 to 16.*—There are three outposts: Pharha, Auncha and Narangibagh.

*Page 133.—OPIUM.*

The farming system (opium) was abolished from 1st April 1910 and shops have since been sold separately. The price of opium has also been enhanced to Rs. 20 per seer. The number of licenses has been increased by two to bring the number up to the required standard for the district. Poppy cultivation has been abolished in this district except in a few villages controlled by the Fatehgarh Officer.

## Page 195.—BHANWAT.

Bhanwat is a small village and is situate some seven miles south-east of Mainpuri. The mounds round it show that it occupies the site of an ancient town. Large bricks (size  $11'' \times 6'' \times 2\frac{1}{2}''$ ) and broken old pottery found there point towards the same conclusion.

Some forty years ago a mound in this village was excavated by the villagers who unearthed a few images but superstitiously refrained from further exploration. Thinking the spot opened by the villagers might be an interesting site P. Hara Nand, an officer of Archaeological Survey department, inspected it on the 16th December 1910. A man called Debi, who was an eye-witness of the excavation, informed him that while a well was being sunk a carved lintel was noticed at the depth of about 6 feet. This was taken to be a part of the door frame of a temple which the owners did not exhume for fear of bad luck. A platform (size  $12' \times 3' \times 12' 10''$ ) now marks the spot in question. The images unearthed are lying near the platform. Amongst them there stands a carved stone jamb which appears to have come from the same place and formed part of the door frame.

There is a beautifully carved panel on the outer door of the Mahadeo temple.

## Page 204.—DIHULI.

A stone pillar bearing inscriptions was excavated in the village in 1908. Estampages of the inscription were taken and sent to the Department of Archaeological Survey of India, Lahore, Hindu and Buddhist Monuments branch, and the Superintendent after examining them reported as follows:—

“The Dihuli stone inscription contains six lines written in Devanagiri Script and incorrect Sanskrit. It is dated in Samvat 1486, Friday, the 5th day of the dark fortnight of Phalguna. It refers itself to the reign of one Maharaja Sri Vira Simha(?) Deva of the town of Dilhaka (probably Sanskritized form of Dihuli) and mentions the village of Soparitpura. In the name of the Raja ‘Sri Vira’ and ‘Deva’ is quite clear. The two letters between these may or may not be *Simha*. Excepting the first two and a half lines the writing is not fully clear to me. But so far is certain that there is hardly anything of interest in it. The last two lines give

the name of the engraver. The latter portion of the third, the fourth and about the first half of the fifth lines give the name of the person (Bhatta ? Devi, the wife of Hari.....) who set up the stone and its object which appears to be the construction by her of a water tank or well."

*Page 244.—NAUNER.*

Owing to height and extent of the Khera the village is conspicuous for some distance. The Khera is one of the largest in the district and is situated close to a bend of the river Isan forming one of the many riverain Kheras, as opposed to those situated near tanks such as Bhanwat, Rasemar, Kaurari, Harer, &c. These Kheras are obviously ancient sites of fortified towns placed by rivers or tanks. The Nagaria distributary, which now passes a little way to the south of the main site, is the chief source of irrigation, but there are the remains of an embankment thrown across the Isan at a distance of six furlongs from the village extending probably at one time for over a mile and 20 feet high excluding another 10 feet of depth for the actual river bed. The embankment was probably faced with a brick wall formed of bricks in which rice chaff is mingled, a practice no longer obtaining, and showing that rice cultivation was general in the tank area. The river sweeps up in a north-easterly direction from the embankment, leaving a large culturable area to the east, irrigated formerly from the water impounded but now commanded by canal water. As is usual in such ancient sites, there are remains of stone sculpture and baked ornamental brick work or pottery, placed in heaps in two positions in the village and worshipped as local dieties. A brick inscription was discovered by Mr. McConaghey, Settlement Officer, in 1869 to 1872 and sent to Calcutta.

The village is owned half by the Awa Raj and half by the Kotla Raj, having been acquired from the original Chauhan owners of the clan of the Raja of Mainpuri who in their turn are said to have obtained it by ousting the Chirars.

*Page 28.—IMPOUNDING OF WILD CATTLE.*

An endeavour was made by the Collector in the year 1910 to capture and impound the wild cattle which infest parts of the district. In one instance partial success was achieved but often religious prejudices are a real obstacle to any permanent relief.

The Agricultural Association has constructed a pound for such cattle as are caught in tahsil Mustafabad. A number of wild cattle have thus been taken and given over to the villagers who have since broken them to the plough. Zamindars of the surrounding villages voluntarily provide fodder for the temporary keep of these cattle.

KRISHI SABHA OR AGRICULTURAL ASSOCIATION, STARTED  
IN 1908.

There is a non-official agricultural association in this district called the "Krishi Sabha" with the Collector as its Chairman. It holds an annual show during the Chaity Ashtami fair which falls usually in March or April.

There are 121 members.

Page 31.—FLOODS.

There was another flood in October, November 1910. Heavy rain accompanied by a severe thunderstorm continued for 17 hours between the 30th October and the 1st November. The rainfall at Mainpuri measured only  $3\frac{1}{2}$ " but to the west it was heavier, being at Gopalpur 9", Jera 18", Jasrana 11", Shikohabad 10", and on the Etah road 10". The Isan rose and its waters began to enter the town on 2nd November and in the evening the same day water was 2 feet deep in Lanesganj. Water flowed 2 feet deep over the Debi road. On the road from the big bridge over the Isan to the city it was breast high. Roads were cut away at various places, particularly the Debi road. The flood began to subside on the 4th and the city was quite clear by the 7th November.

Page 138.—DRUGS.

The drugs contract of the district was split into three parts with effect from April 1913 (1913-14) as follows :—

- (1) Bhongaon.
- (2) Mainpuri-Karhal.
- (3) Shikohabad-Mustafabad.

OPIUM.

1. The rate of opium per seer was, with effect from the 1st April 1910, raised from Rs. 17 to Rs. 20 by Government Notification No. 505/XIII—4 of 9th November 1909.

2. In view of the discontinuance of poppy cultivation in the district the official vend of opium was stopped with effect from the

1st April 1912, vide Government Order No. 9/XIII—20 of the 5th January 1912.

*Page 141.—MUNICIPALITY.*

Ostroi was replaced by a house tax and a tax on circumstances and property, with effect from the 1st April 1913.

*Page 105.*

Raja Narotam Singh of Eka died in October 1912 and was succeeded by his son Raja Jiwan Singh.

*Page 116.*

Proposals to rearrange the villages in tahsils Bhongaon, Mainpuri and Karhal were negatived in April 1911.

*Page 144.—POUNDS.*

There are now 36 cattle pounds in the district; in 1913, as follows:—

- |                  |                   |
|------------------|-------------------|
| 1. Kuraoli.      | 19. Dihuli.       |

FOREWORD.

THE notes in this volume bring the information up to the end of March 1919, and where available up to March 1920, while the census figures of 1911 have also been incorporated in the tables where necessary.

ETAH :

*The 13th May, 1920.*

RAJ NARAIN.

*District Gazetteer of the United Provinces of Agra  
and Oudh, vol. XII, Etah.*

*Page 7.—FERRIES AT KALI NADI.*

There are a number of other privately owned ferries besides those mentioned at various points.

*Page 10.—IMPROVEMENT OF ETAH DRAINAGE.*

The following improvements have been effected in the drainage in the neighbourhood of Etah :—

- (1) Digging the Asroli drain to the Isan Nadi.
- (2) The clearance of Mayne's cut to a proper gradient.
- (3) The construction of a flood embankment to the north-east of Etah.
- (4) The construction of a drain from the jail, crossing the Grand Trunk road by a bridge and fall and discharging into Mayne's cut.
- (5) The rectification of the Kak Nadi by digging a channel 15 feet wide along its course in the immediate vicinity of Etah town from the Amanpur road bridge to a bridge across the Grand Trunk road.
- (6) The cutting through of the Bandi distributary embankment at the point where it crosses the Kak Nadi, thus allowing a free flow for flood.

*Page 12.—USAR RECLAMATION.*

The Irrigation department is also carrying out experimental floodings of selected areas. This will spread over a long period before any decision is arrived at.

*Page 15.—HOG DEER AND BLACK PARTRIDGES.*

No hog deer has been seen for many years now. They are probably extinct. Too much shooting, combined with bad seasons, so reduced the number of black partridges that in 1916 it was deemed necessary to protect them, and their shooting is now prohibited.

*Page 17.—CATTLE CENSUS.*

There have been two census after 1909. In the census of 1915 bulls and bullocks showed an increase, being, 171,643 against 157,760 in 1909. There was a slight increase also in cow buffaloes 1,08,713 against 1,08,006. As regards cows,

male bullocks, and young stock there was a considerable drop as compared with the figures of 1909 as shown below :—

				1909.	1915.
Cows	..	..	..	68,343	63,960
Male buffaloes	..	..	..	20,230	17,011
Young stock	..	..	..	174,742	170,145

The census of 1920, which was taken recently, returned a considerable decrease in the number of all classes of cattle. The decrease is most marked in the case of bulls and bullocks while the position in respect of all heads of cattle is worse than that of 1909. The total number of all heads of cattle in the district in 1920 decreased by 137,858 when compared with the census made in 1915 and by 101,318 when compared with the census of 1909.

The considerable falling off in the number of cattle in 1920 is mainly due to the severe fodder famine of 1918, aggravated as it was by the export of a considerable quantity of fodder from the district immediately preceding the fodder famine. A large number of cattle were sold away to butchers for less than the value of their skins and many others died of hunger or disease due to bad breeding.

*Page 19.*—KASGANJ VETERINARY DISPENSARY.

A veterinary dispensary was also opened at Kasganj in 1916 in a hired building. It has been doing useful work like the dispensary at Etah and promises to become a permanent institution, though for want of a suitable building its progress is much hampered. A horse stallion is also maintained in the Veterinary Hospital, Etah, at the expense of the district board.

*Page 19.*—RAINFALL.

The dry cycle which began in 1897 culminated in 1913—15 when a considerable portion of the district nearly escaped famine. In 1916-17 the average rainfall was over 37 inches, but in 1918 it came down to just 10 inches, while in 1919 it again rose to nearly 35 inches. The excessive rainfall in 1917 and 1919 did some mischief. The bund near Kadarganj was broken and part of Kadarganj was inundated as also the village Himmatnagar Bajhera on the banks of the Ganges. The district apparently is passing through another cycle of wet years.

---

*Page 21.—VITAL STATISTICS.*

The death-rate was abnormal in 1908 and 1918 when it rose to 65·94 and 89·99 per mille respectively. In 1908 malarial fever raged in an epidemic form in the district, while in 1918 the terrible scourge of influenza claimed a heavy death roll. It is curious that in those years and in the year following the recorded birth-rate also fell appreciably. Although birth-rate has all along been over 40 per mille, in 1909 it fell down to as low as 29·96 while in 1918 and 1919 it was 36·66 and 33·78 per mille respectively.

*Page 22.—CHOLERA.*

Cholera appeared in an epidemic form in 1915 when the total number of deaths from cholera was 844. In other years the death-rate from cholera was considerably lower.

*Page 22.—FEVER.*

In 1908 the total number of deaths from fever was 44,760 in the district which number is nearly double of the number of deaths in a normal year.

Even this figure was considerably exceeded in 1918 when a severe epidemic of influenza visited the district. The total number of deaths recorded from fever in 1918 is no less than 70,833.

*Page 22.—PLAGUE.*

Plague again appeared in the district in 1910 and 1911 when it claimed 3,297 and 5,272 persons respectively. It was, however, less virulent than the visitations of 1905 and 1907. The results from the campaign against rats were practically nil and it had therefore to be abandoned.

*Page 23.—SMALL-POX.*

In 1919 the number of deaths from small-pox was 339 while for the remaining years the figures are insignificant.

*Page 33.—WELLS.*

The total number of masonry wells is now 20,499. Of these 15,589 were used in 1326 fasli and the remaining 4,910 were not brought into use. Besides these the total number of non-masonry wells in the district is 31,379. The very large increase in the number of wells is mainly due to liberal takavi advances under the Land Improvement Act.

*Page 34.—WELLS.*

Mention must also be made of the Garwari wells. These are cylinders built of roughly shaped blocks of wood, two or three inches thick, which are threaded on to poles and used as linings in kachcha wells. They are also used for the repair of pakka wells of which the masonry lining has broken low down. Provided the water level keeps up to the top of the garwari, these are fairly stable, and will last for 40 or 50 years. They cost from Rs. 30 to Rs. 60 according to diameter.

*Page 37.—ETAWAH BRANCH.*

The Etawah branch canal has been out of use for many years, the work being done by a distributary running along side it.

*Page 38.—HATHRAS BRANCH, GANGES CANAL.*

This branch was formally opened for irrigation on the 16th December, 1912, and has been of great benefit to the western part of Jalesar tahsil. Passing as it does through the brackish water tract where wells are practically of no use in seasons of insufficient rainfall, it has made fertile a large area, which was formerly dry. A good part of the brackish tract, however, is still unserved, and as the canal has clearly reached the limits of its present capacity, if indeed it is not attempting a little too much there seems no hope for the remainder unless the Muttra experiments prove that the Brownlie tube wells can be used with success. In the drought of 1918 canal irrigation from this branch was distinctly unsatisfactory and complaints were very frequent.

*Page 40.—NADRAI AQUEDUCT.*

A sudden flood which came down the Kali Nadi in 1916 rose to the top of the arches and subjected the aqueduct to a severe test to which it was fortunately equal.

*Page 42.—PUMPING PLANTS.*

In 1915 several pumping plants were set up in this district with the aid of the Agricultural department. Two oil engines were first set up at Bara Gaun and Kendi in pargana Pachlana by Thakurs Madho Singh and Sultan Singh. These were followed by others at Kason Nizampur (Bohrey Jamna Dass), Etah (A. P. Mission), Kasganj (Rao Maharaj Singh) and Bilram (Lala Raghu-raj Singh). Existing wells were used—the water supply when

necessary, being increased by means of a tube sunk through the mota.

*Page 47.—FAMINES.*

In 1913, 1914, 1915 and 1918 rains were in great deficiency and there was considerable distress, though beyond some suspension and remission of revenue and liberal takavi advances, no further measures were needed. The drought of 1914 as also of 1918 hit the cattle worst. Fodder was exceedingly scarce and towards the end of the period cattle were sold for less than the value of their skins.

*Page 48.—FLOODS.*

The tarai tract immediately above the railway embankment between Manpur Nagaria and Kachla Ghat suffered much from inundations which were held up by the embankment. An escape was made through the embankment but proved insufficient, and a 6-mile long bund was built in 1916 to protect the area. The excessive rainfall of 1917 and 1919 also produced local floods near Kadarganj where a bund was broken. Part of Kadarganj was inundated as also Himmat Nagar Bajhera, a village on the bank of the Ganges.

*Page 57.—INDIGO FACTORIES AND FLOUR GINNING MILLS.*

In 1914 when the Great War broke out there was only a single small indigo factory belonging to Lala Murli Dhar of Mirahchi at work in the district. The war led to the reopening of a large number of the less hopelessly derelict factories but owing to certain causes the revival proved to be only temporary.

The Etah ginning factory has ceased to exist. A ginning factory is, however, working at Ganj Dundwara. There are also a number of flour mills in the district.

*Page 59.—TRADE CENTRES.*

The town of Ganj Dundwara has come into prominence as a large exporting centre. A godown belonging to Messrs. Ralli Brothers was working there for several years, but has recently been discontinued. Formerly there were two cotton ginning factories and presses, but owing to disturbances in trade consequent on the Great War one of the factories has been removed. Ganj Dundwara is very indifferently served by roads. It can only be reached by way of very sandy kachcha roads, though a short portion of 8 miles from Sidhpura has recently been metalled.

*Page 60.—FAIRS.*

Mention must also be made of the Urs fair at Marehra which is held every year in the month of Rajab in commemoration of the death of Saiyid Shah Abdul Hasan, late Sajjada Nashin of the Marehra dargah. About 10,000 people assemble at the fair from neighbouring districts. The management is in the hands of Saiyid Mehdi Hasan, Sajjada Nashin, to whose exertions the increasing importance of the fair is due.

*Page 61.—COMMUNICATIONS.*

The metalled road from Etah to Aliganj has been completed. The bridge over the Kali Nadi at Dhumri has still to be constructed on this road and the proposal has not advanced beyond the project stage.

The road from Ganj Dundwara to Sidhpura is also in course of being metalled, while the portion of the road between Sidhpura and Bakawali has already been consolidated.

A new diversion of the Etah-Awah-Jalesar road has recently been constructed near Jalesar straightening the course of the Etah-Muttra road. Through traffic to Jalesar road railway station from Awah and Etah now uses this road without passing as before through Jalesar bazar and the journey itself has been shortened by nearly a mile.

The road from Sidhpura to Bakauli should be continued to Etah. A project has been prepared for the metalling of the road from Aliganj to the border of the Farrukhabad district whence a metalled road already leads to Kaimganj and so to Fatehgarh. Other useful roads which could be metalled are (1) from Kasganj to Sidhpura and Dhumri, (2) from Dhumri to Patiali and Ganj Dundwara, (3) from Jalesar to Hathras and (4) from Awah to Tundla. A project is also being prepared for raising and metalling the road from Soron to Garhia Ghat, the whole cost being generously borne by Seth Lachman Das Gangasagar of Khurja.

Many years ago, the road from Aliganj to Farrukhabad was metalled but subsequently allowed to go into disrepair though much of it still remains.

*Page 62.—RAILWAY LINE FROM KASGANJ TO AGRA.*

The original proposal to construct a line from Kasganj through Etah and Jalesar to Jalesar road station on the East

Indian Railway was modified, and survey operations were undertaken for constructing a line from Kasganj to Agra passing through Etah and Jalesar in this district, at the instance of the Rohilkhand and Kumaun Railway Company. Owing to the war, however, further action had to be postponed.

*Page 64.*—BUNGALOWS.

The bungalow at Bhadwas has ceased to exist. Two canal rest houses at Locha Naharpur and Kazipur Badanpur have also been provided on the new Hathras branch canal in the western portion of the Jalesar Tahsil. There is no canal rest house at Etah. The existing canal rest houses are distributed over the various divisions as follows :—

MAT BRANCH DIVISION.

1. Lamcha Inspection House.
2. Qazipur       "       "

ALIGARH DIVISION.

1. Tatarpur Inspection House.
2. Tilokpur       "       "
3. Pilkhatra     "       "
4. Borrah        "       "
5. Jalesar       "       "

MAINPURI DIVISION.

1. Sunna Inspection house.
2. Bajhera       "       "
3. Kartala       "       "
4. Chachena     "       "

NARORA DIVISION.

1. Nawabpur Inspection House,
2. Kinawah       "       "
3. Nadrai        "       "
4. Gorah         "       "
5. Badhari Kalan   "       "
6. Amanpur       "       "
7. Sewanpur      "       "
8. Keloni        "       "
9. Dhumri        "       "
10. Mundha       "       "
11. Sikandarpur   "       Bungalow.

## 12. Pehra Inspection House.

*Page 67.—CENSUS, 1911 (NEW PARAGRAPH).*

The enumeration in 1911 took place on the 10th March, 1911. The district total stood at 8,71,937, a slight rise over the figure of 1901 (863,948). The average density of the population per square mile of total area advanced from 499.1 at the census of 1901 to 504 in 1911. As in 1901 the number of males (474,576) was larger than that of females (397,421.) It is remarkable that the population of Etah and Jalesar tahsils decreased by 12,943 and 8,727, respectively, while Kasganj advanced by 8,978 persons and Aliganj by no less than 20,741. This was probably partly due to the effects of the famine of 1907-8 from which Etah and Jalesar tahsils suffered the most.

The census figures show that in 1911 the district contained 764,824 Hindus, 91,399 Muhammadans and 15,774 others.

*Page 69.—RELIGIONS.*

There is a very remarkable increase in the number of Christians as returned in the census of 1911. From a very small beginning of 117 Christians in the district in 1881 the population steadily rose and the total number now is 11,077. There are now four ministers and the Church Missionary Society has taken over the work of the Methodist Mission also. The converts to Christianity still come from the lowest strata of Hindu society.

The number of Hindus have increased by 5,932 in the census of 1911 while Muhammadans actually show a decrease by 1,098 compared with the figures of the census of 1901. It is not known what this decrease is due to. The number of Sikhs in the district has also declined from 779 to 403 and Jains from 4,344 to 4,292. The Aryas, on the other hand, have increased from 3,069 to 4,536. There is no Jew in the district now.

*Page 84.—CRIMINAL TRIBES.*

In 1916 the settlements of Aherias and Haburas at Awah, Chamkari (Etah) and Amanpur were all removed to the Salvation Army settlement at Kashipur and Najibabad (Bijnor district) under section 12, Act III of 1911. In 1917 the Haburas of the settlement at Sidhpura were similarly deported to Cownpore. Other members of the criminal tribes who have had previous convictions have been registered under section 1 of

the same Act and their movements have been restricted.

*Page 87.—PRINTING PRESSES AND PERIODICALS.*

There are now six printing presses in this district, three at Etah, two at Kasganj and one at Jalesar. All of them print Nagri and Urdu characters. Three newspapers are also printed and issued periodically in this district, two in Hindi printed at the United Provinces Art Printing Works, Kasganj, one named "Mittra" edited by Lala Hundi Lal and another named "Dhanwantri" edited by Pandit Radha Ballabh, while the third is an Urdu fortnightly called "Etah District Magazine" edited by Pandit Jai Nandan and printed at Chanakya Press, Etah. These periodicals have not yet gained any importance and command very little circulation.

*Page 89.—MAXWELL FAMILY.*

The Maxwell family have left the district and gone away to England. They have sold away all the villages formerly belonging to the Raur concern.

*Page 92.—AWA ESTATE.*

The Awa Estate, after the death of Raja Balwant Singh in June 1909, passed into the hands of certain trustees under a will executed by the late Raja. At the request of the trustees and the Rani (widow of the late Raja Balwant Singh) the Government took the management of the estate under the Court of Wards at the close of 1910 for the period of the minority of Raja Suryapal Singh. The estate was managed under a special scheme and was released in October 1917 when the present Raja came of age.

*Page 92.—UMARGARH ESTATE.*

The estate has been under the management of the Court of Wards since October 1912. The owner (widow of Thakur Netrapal Singh) for the most part resides in Jaipur.

*Page 92.—RIJAUR ESTATE.*

Raja Sanwal Singh died on the 17th September, 1919. He left two widows and a litigation took place between them for the succession. Thakur Harchand Singh was also one of the claimants. The revenue courts have decided in favour of the elder Rani who is now managing the estate.

*Page 95.—RAMPUR ESTATE.*

In 1916 the Court of Wards again assumed the management owing to the incapacity of the Rani to manage it herself.

---

*Page 95.—RAMPUR RATHOR FAMILY.*

A junior branch of the family is settled at Sarnau. It is now represented by Thakur Durbijai Singh, whose great-grand-father's own brother was the father of the late Raja Ram Chandar Singh.

*Page 96.—KAYASTHS OF KASGANJ.*

The estate was sold in execution of a decree and purchased by the Raja of Awa some time ago. Rao Maharaj Singh, however, succeeded in getting his portion released by order of the Privy Council and the residue so left is now held in his name. It is also encumbered and proceedings are in train for taking it under the management of the Court of Wards.

*Page 97.—MAREHRA SAIYIDS AND DARGAH MUAFI.*

Besides the pension there are three different classes of muafi grants—

- (1) The dargah muafi grant comprises 12 villages. In regard to these the original arrangement was that the rents of the muafi villages were released by the Muhammadan rulers in favour of the dargah. When the earlier settlements were made, the names of the Saiyids in possession were, apparently through a mistake of the settlement officers, recorded as zamindars holding revenue-free, the amount only of the revenue being shown as payable to the dargah. Subsequently the Saiyids became much indebted and have now, for the most part, alienated their zamindari rights in favour of outsiders. Moreover, a claim was set up and admitted in 1853 by Government that the Saiyids were entitled to half the revenue for their own maintenance and, further, it has been laid down by the Honourable High Court that the revenue payable is fixed in perpetuity at the jama of the settlement made under regulation IX of 1833. Half of the revenue so fixed is collected by the dargah committee at present consisting of S. Hamid Hasan, S. Ali Ahsan and Chaudhri Muhammad Khalil who manage the affairs of the Dargah. Formerly the committee was bound to render annual accounts to the Collector, but after a thorough enquiry made in 1915 and 1916 it was decided that Government

had no concern whatever with the management of the Dargah endowments.

- (2) A grant of six villages was also made for the maintenance of the Saiyids. The zamindari as well as muafi rights in all these villages, except small fractions in two, have been sold away to outsiders.
- (3) For the upkeep and expenses of the mosque and khankahat Marehra a third class of muafi consisting of eight villages was granted to the Saiyids. Owing to their indebtedness the zamindari rights in most of these villages have also been sold away by the Saiyids. Alienation of muafi rights also took place in some of these villages and the Board of Revenue decided to give the Saiyids an opportunity to redeem the muafi shares. Redemption has accordingly taken place in all but fractional shares in two villages—Tilokpur and Dadanpur—which have now been reported for assessment of revenue.

The affairs of the dargah have been a constant source of trouble and on three occasions have exercised the attention of Government. There were continual disputes arising mainly from the complicated evolution of the original rights. After a thorough enquiry a settlement, which may or may not prove final, was made in 1917.

In the arrangement of 1853 the pension used to be paid to the dargah committee by the Sajjada Nashin of the Bara Sarkar who was himself a member of the committee. On the death of the late holder in 1906 Saiyid Shah Mehdi Hasan, the present Sajjada Nashin who is unconnected with the dargah committee obtained an order of the civil court entitling him to draw the pension. He used to submit yearly accounts and budget estimates to the Collector, but in the settlement of 1917 this was ordered to be discontinued. The members of the dargah committee had been constantly raising objections as to the proper expenditure of the pension money, and it has now been decided that after the death of the present holder the pension should be made payable to the dargah committee and be accounted as part of its funds.

The sanctioned magisterial staff in addition to the District Officer now consists of one J.P., and four full-powered Deputy Collectors and one Treasury Officer. At the present time the staff consists of five full-powered Deputy Collectors, one of whom is in charge of the treasury and two temporary Deputy Collectors with second class powers and one probationary Deputy Collector with third class powers. Under the new scheme a special Income-tax Officer has been appointed for Aligarh, Mainpuri and Etah with headquarters at Aligarh. Besides the Bench of Honorary Magistrates at Marehra two benches of Honorary Magistrates have been constituted, one sitting at Soron and another at Bilram. The former consists of three members and the latter of two, all invested with third class powers. There are also five special magistrates who sit singly. Haji Ghulam Mohammad Khan, Khan Bahadur, of Mohanpur and Rai Indar Narain of Sakit exercise second class powers and the rest have only third class powers. There are also two Honorary Munsifs, namely Chaudhri Mohammad Azizullah Khan, Khan Sahib, of Sahawar and Rai Ram Narayan of Sakit. There are also six Honorary Assistant Collectors invested with second class powers, five of whom have been recently appointed in the district.

*Page 113.—POLICE CIRCLES.*

It has been found necessary to post a sub-inspector at the Nidhauili kalan outpost and to reopen the old station of Amanpur as an outpost under the charge of the second officer of Sidhpura thana.

*Page 117.—EXCISE.*

The contract supply system is now in force in the district. It replaced the distillery system in 1917-18. Two bonded warehouses have since been established in the district, viz. (1) at Etah and (2) at Kasganj, liquor being imported from Cawnpore by the Sugar Works Company, Limited.

There were 35 retail shops last year. Four shops more have recently been closed with effect from the 1st April, 1920.

The average annual receipts from this source have been Rs. 26,196 during the last nine years and the average number of L. P. gallons sold every year has been 7,498 during the same period.

The rate of duty in 1915-16 was raised from Rs. 3 to Rs. 3-8 per L. P. gallon. It has been increased further from time to time and the rate now is Rs. 6-4 per L. P. gallon. The contract sale price of country liquor too has been raised from Re. 1-0-6 to Re. 1-8-6 which is the current rate

*Page 118.—TARI.*

The shop-to-shop system was introduced in 1913-14. The number of licensed shops was 31 up to 1919-20. Eight more tari shops have since been closed with effect from the 1st April, 1920. The average annual receipts for the last nine years have been Rs. 4,299.

*Page 119.—HEMP DRUGS.*

There were 47 shops up to 1919-20. Twelve shops more have been recently closed with effect from the 1st April, 1920. The system of farming out each tahsil separately for three years has again been brought into force from 1917-18. The settlement for all the four tahsils of the district for the next three years has been made for a total amount of Rs. 45,000 with effect from the 1st April, 1920. The average annual receipts for the last nine years amount to Rs. 13,841. The average sale of bhang and charas has been, respectively, 2,523 seers and 428 seers 12 chhataks during the last nine years.

*Page 119.—OPIUM.*

Each shop is put up to auction separately. The number of shops licensed to sell opium was 16 up to 1919-20. Of these two have been further closed with effect from the 1st April, 1920. The average annual receipts from license fees for last nine years amount to Rs. 3,397 and the annual average consumption amounts to 1,289 seers. The issue price originally was, some time ago, only Rs. 17 per seer. It was raised gradually to Rs. 25 up to 1917-18, in 1918-19 it was Rs. 30 per seer, in 1919-20 Rs. 40 per seer and is now Rs. 45 per seer for the year 1920-21.

*Page 121.—MUNICIPALITIES AND TOWNS.*

Under the new Municipalities Act 1916 the municipal boards of Etah and Jalesar each have elected a non-official chairman. The Sub-Divisional Officer, Kasganj, is still the chairman of the municipal board, Soron, while the District Magistrate is the chairman of the Kasganj municipal board with the only differ-

ence that both are now *ex-officio* chairmen and not elected as before. A tax on circumstances and property has been imposed in the Etah, Soron and Jalesar municipalities where octroi tax has been abolished.

The constitution of each board has also been revised as indicated below :—

Elected members.				Nominated members.	Total.
	By non-Muslms.	By Muslims.	By special elections.		
Etah ..	5	3	..	2	10
Kasganj ..	5	3	1	2	11
Soron ..	5	1	..	1	7
Jalesar ..	4	2	..	1	7

There are now 11 towns in the district, Kadarganj having been reduced to the status of a village. The details of the receipts and disbursements of the town funds are shown in the attached statement. The cost of the town police is no longer borne by the town funds. This has now become a provincial charge paid by the Government. These towns are now administered under the new Town Areas Act (II of 1914) which repealed Act XX of 1856. Panchayats are now invested with greater powers and the principle of election has also been introduced. The smaller towns have three panches each appointed by the District Magistrate, but Aliganj, Sahawar, Sakit and Ganj Dundwara have two more panches, who are elected. Ganj Dundwara is rapidly developing and steps are being taken for converting it into a notified area.

The Village Sanitation Act (II of 1892) is no longer in force in these town areas as the new Act itself contains sanitary rules. There are now 29 villages in the district with a population of 2,000 and over to which the Village Sanitation Act is applicable (vide list appended)

*Page 122.—DISTRICT BOARD.*

Up to 1918 the work of the Secretary, District Board, was carried on by a member of the gazetted staff of the district. In March 1919 Lala Raghuraj Singh of Bilram was appointed Honorary Secretary. Lala Raghuraj Singh has since resigned and the Board has now appointed a full-time paid Secretary.

*Page 122.—EDUCATION.*

With effect from the 1st April, 1910, the High School at Etah became a purely Government institution. A magnificent building has been constructed for housing the High School about half a mile from Etah on the Etah-Sakit road. A boarding house has been constructed within its compound as well as residential quarters for the head master. The school prepares boys for the S. L. C. examination. The present staff consists of 18 teachers, including one drill master and the enrolment at present is 271. In 1919 37 boys were sent up for the S. L. C. examination, 24 being successful. In the current year 35 boys have appeared for the same examination.

With the aid of the Government grants the District Board has made considerable headway in education. In place of the five tahsili middle schools noted in the Gazetteer there are now eight middle schools; three middle schools having recently been opened at Soron, Patiali and Dhumri. The number of primary schools has also increased from 144 to 181. There are 15 girls' schools in charge of the District Board while a Model Girls' school teaching up to the middle standard has been established by Government at Kasganj. The total number of scholars on the 31st March, 1919, was 13,487 including 2,559 girls and 80 boys of the depressed classes. Addition has also been made to the training classes which prepare teachers for the primary schools. In 1919 there were six training classes but now eight classes with eight pupil teachers in each are working, four in each of the tahsili headquarters and the remaining four at Awa, Sakit, Patiali and Marehra. There are five aided maktab in the district while an Islamia school is also being opened at Bilram this year. To supervise these and to encourage education among Muhammadans a district maktab committee has been formed.

A new feature is the peripatetic magic lantern school. It

was started in January 1919, and moves about the district in charge of a lecturer. Slides relating to agriculture, irrigation and industries are shown and explained. Slides relating to the Great War were also exhibited in the beginning.

The Deputy Inspector and the two Sub-Deputy Inspectors of schools are no longer paid by the District Board but are on a provincial establishment paid by Government.

*Page 124*.—DISPENSARIES.

A new dispensary for women was opened at Etah in 1914 in a building specially built for it in memory of His late Majesty King Edward VII. Another dispensary for women was opened at Kasganj in a rented building as an experimental measure in 1917. It had, however, to be closed in April 1919 as the building proved to be insufficient and no other suitable accommodation could be had at Kasganj, though the utility of the dispensary itself was very much appreciated by the public.

The opening of a new dispensary at Gunj Dundwara has recently been decided upon by the Board and steps are being taken to acquire a proper site for it.

The number of in-door patients treated at all the dispensaries in 1919 was 1,742 while the number of out-door patients treated was no less than 118,277.

*Page 125*.—CATTLE POUNDS.

There are now 29 District Board pounds as follows:—

*Etah tahsil 7*.—Pilwa, Pawans, Rijore, Sakit, Garhi Bendula, Nidholi and Malawan.

*Kasganj tahsil 7*.—Amanpur, Udher, Bilram, Sidhpura, Mohanpur, Sahawar and Kharia.

*Aliganj tahsil 11*.—Barhola, Patiali, Thana Daryaoganj, Jaithra, Aliganj, Dhumri, Rampur, Gunj Dundwara, Kadarganj, Sarai Aghat and Nardauli.

*Jalesar tahsil 4*.—Awagarh, Umargarh, Pilkhatra and Jalu Khera.

In 1919-20 the income from these pounds amounted to Rs. 13,086-13-0 while the expenditure was only Rs. 4,804-13-8.

*Page 125*.—NAZUL.

Three other small properties have recently been vested in Government as their owners died intestate. These consist of

(1) a revenue-free plot of .71 acre in mauza Sikandarpur Marhi, pargana Jalesar, (2) resumed muafi land of .47 acre in mauza Bakshipur Rajpur, pargana Etah Sakit, and (3) a revenue-free plot of .34 acre in the town of Aliganj.

DIRECTORY.

*Page 165.—BORRAH KALAN.*

Chidu Lal having attained majority the Court of Wards has released his person and property from its management.

*Page 175.—JALESAR.*

Jalesar town is 26 miles distant from Etah (not 23 miles as noted in the Gazetteer). A chord road has been constructed near Jalesar which now carries off the through traffic from Awah to Jalesar road railway station without passing through Jalesar bazaar. The road journey from Awah to Jalesar road railway station has thereby been shortened by at least one mile. A District Board Inspection House at Jalesar will also be constructed in the near future as the municipal bungalow on the Fort has insufficient accommodation even for the office of the municipal board, while the canal bungalow is very small and is nearly two miles from the tahsil and the thana. There are now seven salt petre refineries in Jalesar all doing considerable business. A glass factory of the Firozabad type has recently been started in Jalesar with some success. There is also a scent factory at Jalesar. A number of shops have started manufacturing ghunghrus (bells) for export quite recently. There is at present a large trade in the town in this commodity.

Under the new Municipalities Act, 1916, the Municipal Board, Jalesar, has elected a non-official chairman. The Board consists of seven members of whom four Hindus and two Muslims are elected while the tahsildar of Jalesar is the nominated official member. With effect from 1913-14 octroi has been abolished and a tax on circumstances and property has taken its place.

*Page 166.—ETAH.*

The town has much improved by several important buildings having been built recently, such as the post office, the record room, the police office, new mission bungalows. A new Government High School building has been constructed nearly two furlongs from the town on the road leading from Etah to Sakit,

while the former school building in the town is now used as a Vernacular Middle School. There is no ginning factory in the town now, but a new flour mill has been started by Rai Indar Narain of Sakit. The affairs of the town are managed by a Municipal Board of 10 members, of whom 8 are elected and 2 nominated with a non-official elected chairman. A tax on circumstances and property has replaced the octroi tax which was abolished with effect from the 1st April, 1913.

*Page 213.—SAKIT.*

The temple mentioned in the Gazetteer was really begun by an ancestor of Lala Misri Lal, pensioner of Etah, and not by an ancestor of Rai Awadh Narain as noted in the Gazetteer. A branch of the Bindraban Gurukul has been established in Sakit by the generosity of Rai Ram Narain. The institution is yet in its infancy.
